Index

Almost for 60 years now, since 1951, that G-Lights started its activities and still today it is a family-run company with its own comprehensive production in Barcelona.

The constant dedication to each of our customer's requirements has always been our main criteria to follow in our company's system of operation.

Our enthusiasm for the purity of styles, handcrafted manufacturing systems and quality in each element, inherited and followed by a third generation leads us to present this lighting book-catalogue today which besides from the traditional models available among our offer, it incorporates modern designs without loosing the quality that has always certified G-Lights.

BARCELONA, MARCH 2009

History

G-Lights started its activity in 1951 as a manufacturer of pieces in cast brass and sand cast bronze, later extending it with gravity operating moulds. Since 1961 we manufacture lighting articles for the five continents, satisfying the tastes and requirements of each of our clients worldwide.

G-Lights, WE CAN

Production

We manufacture the pieces of our moulding (casting – spinning – handling – polishing – finishes) in our different workshops in Barcelona and the rest of Spain.

G-Lights, WE CAN

Team

Craftsmen in casting (sand - lost wax – gravity – injection), in chiselling, in handling metals, in spinning, in welding, polishing and varnishing or any other finish.

Designers inside and outside G-lights constantly update and transform the collections of the past for the uses of the present times.

Collaborators who work the glass in factories in Barcelona, as well as the shades and the ceramic, and marble, wood or alabaster both in Barcelona and in other points of Spain.

Management who follow and prioritize customer needs.

G-Lights, WE CAN

Inheritance

Cast moulds
Glass moulds
Spinning moulds
Hundreds of lighting books
Thousands of designs of all the periods
Years of experience
G-Lights, WE CAN

International client's base

We export since 1961 over 90% of our production to 70 countries of the 5 continents. Our exclusive client database is the best expression of leadership in capability, quality and service.

G-Lights, WE CAN

Custom made

Only a part of our collection is present in our catalogue. With more than 40 finishes in different metals (many of them manually), and coordinated with fine materials.

Our monitoring, designs, specific requirements of each project and our quality of compliance with our customer's demands.

G-Lights, WE CAN

Just in time

Our commitment with the execution periods of each stage of the project, and installation in collaboration with the client and his usual transport company, as well as the packing required at each moment.

G-Lights, WE CAN

Technology and innovation

Our samples department will provide the necessary pieces, standard or specific, for the making and presentation of the pieces or finishes, and mock up rooms, following the quality and budget requirements on each occasion.

Our technical team works constantly in the improvements of our products and production systems, adapting to your requirements both in energy save (PL or LED lighting), as in respect for the environment.

G-Lights, WE CAN

Showroom and display

Permanent exhibition at our offices in Barcelona where customers may see our entire collection as well as design their own models for their projects.

G-Lights, WE CAN

Standard product

We assure the delivery of the standard catalogue products in a maximum of 4 weeks, if not immediate.

G-Lights, WE CAN

Added value

G-Lights supplies to suppliers of:

Major hotel groups,

Independent hotels,

Cruises,

High lines shops

Restaurants

Museums

Turn key projects

G-Lights, WE CAN

We can

Our SLOGAN **G-Lights We can** was introduced together with our New logo in 2005, consequent with our history.

Pisa

An elegant neoclassical style collection made from brass with sections of tube and cast pieces. This version is available with glass alabaster tulips (9969) and subtle patina on manually aged antique brass (MS) finish. In the version with black Mediterranean chintz shades with silver reflections (9948 – 9968), imperial black patina on nickel (NIA) has been selected. Additional wall light (9970) on pages 216/217.

Best value for money.

Drops

Collection 9960, in brass, reproduced from originals with the consent of the original British manufacturer. Adapted to more informal needs with finishes in imperial black patina on nickel (**NIA**) or with storm brown (**MAO**). Series 9423 with an Empire style design, in metal and finished with Azteca silver patina (**PW**). Adornments are made from clear and frosted glass (**9960**) (see photo) or with faced crystal drops (**9423**) or crystal kopens (**9323**), and with shades in ivory oriental silk; while 9323, Empire Bohemian traditional style, is finished in polished nickel (**NI**) and uses Bohemian crystal kopens.

Influences

Classic styles found in books of the time period, today adapted to our times. Made from cast brass and resin. Their finishes are based on manually applied antique golden bronze patinas (**GBZ**). Series **9975** includes lampshades in ivory Mediterranean chintz and series **9978** has sophisticated hand cut blown glass with an aniseed iridescent finish. Series **9319** manufactured in brass and finished in hand English bronze patina (**PIN**) complemented with shades in Tennessee Cotton.

Arts & Crafts

Based on the style of the Arts & Crafts movement, a British variant of the Art Nouveau style from the beginning of the 20th century. It includes versions made on metal and cast brass parts. Finished in a combination of manually aged antique copper and satin black (**NGO – ACO**). As an accessory to the design there are blown-glass tulips with a matt opal (**9622**) or iridescent finish (**9956**). Specify type on your request.

Broadway

An extensive collection made from metal with cast aluminium or turned wood details (depending on model). The cased opal blown-glass shades (series **98105**) and ivory Mediterranean chintz fabric (series **98003** and **98004**) complement the contemporary design. Finished with gold plated and stain mahogany woods (**GP-WCA**) (series **98004**) or chrome (**CR**) for the other series.

Best value for money.

For technical details see page 41.

Ambience

Elegant collection in a modern style that combines the design and shape of metal elements with complements in blown-glass in the Betulo style. The finish with chrome plated and glass in the modern and contemporary colour aubergine (**CR-GOV**) bestow it with a unique value. The recommended shades are in Machu Picchu Silver.

Best value for money.

Berlin

An angular collection in cast brass that is both robust and elegant. This Post-Deco range is featured in a brushed nickel finish (BN). The design is complemented by shades in white natural alabaster which seem to float freely in the air. The G-9 bulbs increase illumination to further enhance the style.

→ Additional pendants and wall washes models are available on request, as well as other finishes.

Stilton

A collection in Georgian style, originally from central England, made from metal with cast brass and subtle patina on manually aged antique brass (MS). The blown, detailed glass, hand cut in Barcelona, up-dates the collection for modern day decorating of lordly places. The decorative sailor's knot (see pages 242/243) on model 9432 can be added on request.

Aladdin

An elegant collection for interiors with double Aladdin lamps –cast brass- on a circular pipe structure. They come in standard finishes of polished brass (PB) or manually aged antique brass (AB). Both are recommended with shades of ivory Mediterranean chintz. Additionally, table and wall lamps are available in a brushed nickel finish (BN) and black shades of equal quality. Imperial black metal or polished brass metal complementing shades are supplied on request.

Lords

Collections from British and French traditional origins from different periods. Made from brass and adapted to the XXI century after several modifications. In the original "Gas Light" (9421) series, the glass chimneys have been removed, keeping only the outside carved tulips and a subtle patina manually aged antique brass (MS) finish. The 8035 series comes in the classic "French gold tone" patina style (FA), while the 7013 series is given a polished brass (PB) finish with black imperial details. The recommended lampshades are ivory Córdoba pleated in 8035/TL and black oriental silk in 7013/TL.

Tavern

The Tavern collection evokes the designs used for railway carriages and steam boats in the Victorian era. Made from brass with blown-glass in the shape of a hand cut pineapple with a polished brass finish (**PB**) in series **950** and **951**, while a more informal concept is offered with the manually-aged antique brass finish (**AB**) and iridescent glass (series **960** and **961**).

Kensington

In a colonial style taking full advantage of the elegance of the arms made from cast brass in the shape of a trumpet with various high quality materials. The series **9077** (with wood) comes in manually aged antique brass (**AB**) for informal decoration. While series **9076** (with glass included) is available in a polished brass (**PB**) or finished with polished nickel (**NI**), these are appropriate for classical or contemporary spaces. The recommended shades are (see photo) in Tennessee cotton (**9077**) or in black oriental silk (**9076**).

Louvre

This Empire style collection, in brass, with swan-shaped arms in sand cast bronze manually chiselled by our craftsmen, still has a contemporary feel. The polished finish, achieved by applying the patina by hand, gives it that antique French gold tone (**FA**) which still evokes that time period. The recommended lampshades are in black Mediterranean chintz with gold trims. Complementary models on page 150 (**9058/TL2**)

Imperial

Originally from the Empire style made from sand cast brass and bronze and hand chiselled by our craftsmen. This collection evokes a whole era. Finished with patina in the French gold tone style and polished by hand (EA) with metal accessories in imperial green. Today we are offering the collection with rich hand cut glass tulips.

→ Special sizes and models on request (see page 267).

Mithology

Based on mythological figures, originally found on wall lamps in antiquaries on the Mediterranean coast. Reproduced in sand casts with all their details hand chiselled by our expert craftsmen and accessorised with other parts and adornments in brass. Manual finishes with green oxide patina (**CPV**) for series **9710** or with gypsum white texture on brass (**GPB**) in series **9763** give life to the figures in their settings. Beautiful pieces of palatial natural alabaster complement the series.

Rocafort

Mediterranean neoclassical style collections made from brass with superb sand cast features. The finish using patina on manually aged bright antique brass (MB) uses frosted glass as an accessory. Series **9983** corresponds to a simpler model without decorative “curtain” adornments on the arms. For additional models see pages 130 and 246/247.

→ Special sizes on request.

Segovia

Inspired by the French influenced Art Nouveau style. Made from brass and adorned with artisan touches such as hand cut blown-glass (9656) or amber Empordà finishes (9967). The finishes using patina on manually aged bright antique brass (MB) (9656) or discrete manual touches (AB) (9967) modernise styles that have a hundred years of history behind them.

Windsor

Art Nouveau style collections for contemporary uses. Made from brass, with cast brass and sections of tube. Manual finishes with green oxide patina (**CPV**) gives them the desired antiqued appearance. The accessories with matt (series **9991**) or amber Empordà (series **9971**) period glass give them a nostalgic air.

Hall

A reproduction of a Deco model used in the entrance hall of a Parisian bank in 1930 and recovered from a specialized antique dealer in the French capital. Adapted to today's modern lighting requirements. The original rectangular lamp is the base of those manufactured today. The side panels are hooked up with corners made of brass. Supplied in polished brass finish (PB) with opal acrylic diffusers. To be used in entrance halls and other highly elegant public areas.
→ Special sizes and shapes on request.

Scotland

Based on an original “gas light” Victorian model exhibited in a Scottish castle. Up-dated to today’s needs without losing its romantic style. Made in cast and other matching parts of brass and supplied in a oriental bronze patina finish with adornments in subtle and aged antique brass (**MS-BZO**) with lampshades in green Meditarranean chintz or natural Celtic texture (as per wall light photograph). Ideal for use in sophisticated salons of a most classic and elegant style.

Billiard

Our already classic collection is as popular as the billiards themselves, having been used in over 70 countries for lighting all kinds of games rooms in their different varieties. Made from solid brass with cast central pieces. The normal finishes are in polished brass (**PB**) or in manually aged antique brass (**AB**) (**4015** only in **PB**). Accessorised with metal lampshades with a green imperial finish (**4016**) or with green opal cased blown glass tulips (**4015**). **4016** can be supplied in green opal cased blown glass on request. Series **9337**, as a variant it is used in oriental bronze patina (**BZO**) finish with shades in ivory mini-pleated with brass art nouveau style ornaments.

Best value for money.

Haima

The knowledge of glass making is attributed to the Egyptians in the year 1500 B.C. (although glass had previously been made in Mesopotamia). The Phoenicians, by creating the "bunting iron" were pioneers ahead of the famous Venice and Bohemia schools during the Middle Age. As a base, they used iron casts – wood or simple shells made with metal rods in the shape of a "cage" as is the case used in the Barcelona factories for these series. The collection is completed with metal and cast parts which are offered as standard versions for all models with the nickel polished finish (**NI**) or Florentine finish (**FLO**). The glass is supplied in clear (**GCL**), aubergine (**GCV**), amber (**GCA**), matt (**GM**) or Etruscan (**GSC**) finishes, on request. Model **9308/W1** can face upwards or downwards.

Raj I

Of a British colonial style and for using in different areas of mansions in capital cities, this series is currently present in different styles of sumptuous decoration. The variety of sizes makes it easier to choose the model to use.

Made from brass and blown glass made with our own moulds. Their finishes are polished brass (**PB**) or manual aged antique brass (**AB**), both with clear blown glass.

Glass with other finishes such as matt or iridescent, on request.

Raj II

To complement our Raj I collection, this series, mainly used at the time in provincial and less de luxe atmospheres, is currently suitable for informal decorations. Made from metal, they are supplied in manual fall golden patina (**GA**) or in oriental bronze patina (**BZO**) finishes with clear blown glass. The glass is supplied matt or iridescent "on request".

Best value for money.

Entries

Different classic style models are used in simple or regal entrance halls, however always remaining elegant. They are all made from brass (cast and other elements). Combining with their sober finishes the decorated glass matches, in champagne and hand cut or matt, according to the photograph. Finishes in aged antique brass (AB) (9986, 9987 and 9988), patina on manually aged bright antique brass (MB) (9983), Azteca silver patina (PW) (9973) and hand application of patina style "French gold tone" (FA) (9989).

Cazorla

Beautiful traditional collection of desk lamps manufactured with cast brass pieces and other brass and metal elements. Faithful reproductions of yesterday for environments of today, designers like M. Fortuny and E. Ruhlmann were excellent on these type of items around 1910 and 1930 respectively. Finished according to individual technical tables. Polished brass (**PB**), manually aged antique brass (**AB**), chrome plated (**CR**), gold plated (**GP**) or polished nickel (**NI**), manually aged gracia bronze patina (**BZF**). Model **9940** includes sections lined in black caribou texture. The shades with black deer leather (**806**) blown glass in cased opal green (**807**) – (cognac under request) or black lacquer (**20218**) complete the offer.

Tivoli

Reminiscing passed times and different styles from books on lighting from Loetz To Dunaime and Dirk Van Erp (around 1910) we present these series manufactured in cast bronze with brass complements. Finished depending on model in polished nickel (**NI**), manually aged antique copper (**ACO**) and oriental bronze patinas (**BZO**) or hand English bronze patina (**PIN**). The glasses are especially developed for each model, whether glass alabaster – iridescent or fused glass whilst the ivory mini-pleated shade (**9474**) is enclosed in a metallic polish nickel frame.

Bodies

The main bodies made of ceramics are the base of the models of this varied collection. They are complemented with metal pieces in different finishes, so that with the suitable shades, they decorate areas for every use and style. The polished brass (**PB**) and the chrome plated (**CR**) complete the different finishes of the ceramics, burgundy (**CBU**), snow white (**CW**) or cobalt blue (**CAZ**) and manual fall golden patina (**CGA**) or manual fall silver patina (**CP**) as well as Florentine finish (**FLO**) according to models' technical table. Models **9923** and **9924** are offered with Tennessee cotton shades, **9317** in ivory oriental silk and the rest of models with shades in ivory Mediterranean chintz .

Aries

The first articulated swing arm models of which details exists, date back to XIX century. In 1920, more neoclassic designs started to appear in Denmark which later became popular due to their use in the hotel industry. The "Aries" collection has reached its 33th anniversary in our Barcelona workshops.

Made from first class brass with standard finishes such as polished brass (**PB**) and lampshades in ivory Mediterranean chintz. They are complemented with the innovation of using additional LED lighting according to the photograph. Some wall lights are also supplied in a brushed nickel (**BN**) finish.

Bathroom section

Mirror which incorporates an energy saving light inside.
→ Special measures on request.

Bathroom regulations

Lighting regulations, recommended for bathrooms areas. Only shower / bath areas are relevant in these regulations.

ZONE 1 — BATH/SHOWER AREA

Zone 1

Area where the shower tray or bath is located. Only 12 V luminaires with safety remote transformer and a minimum protection IP 67.

Zone 2

Area surrounding 60 cms. zone 1. Luminaires at 240 V or low voltage (Classes I-II or III) and a minimum protection IP44.

Zone 3

Area of 240 cms. around zone 2. Luminaires with a minimum protection IP23.

Outside zone 3

Any luminaire can be used.

20265 IP44

NOTES

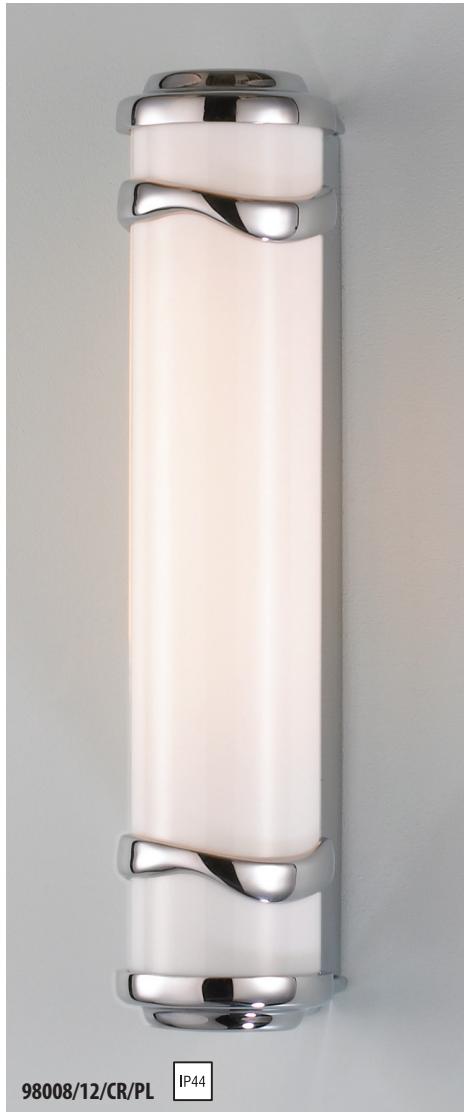

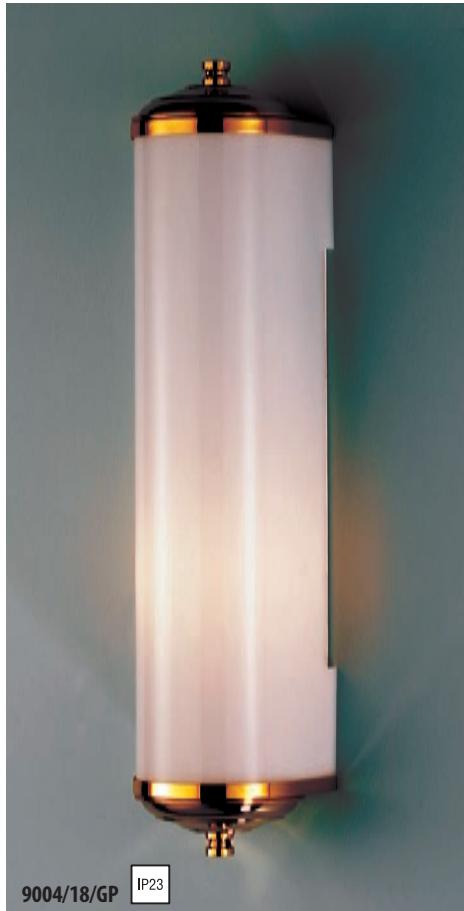

G-Lights products are all wired on class I but can be wired on class II upon request.

- IP44 IP44 protection against solid bodies exceeding 1mm and against water sprays.
- IP23 IP23 protection against solid bodies exceeding 12 mm and against rain.
- Class 1 luminaires are provided with insulation only and earth connection.
- Class 2 luminaires have double insulation to avoid accidental contact (from users) with parts under tension.
- Class 3 luminaires connected for low voltage use (under 24V) through a safety transformer.

Casa Fuster

In a modernist style building, (in the centre of Barcelona) reconverted into a hotel, we find unique pieces manufactured according to the customer's design for his lounge "CAFÉ VIENA" and others. The large floor lights finished in manually aged Gracia bronze (**BZF**), and with brown Barcelona taping seem to form part of their own structure. The table lamps with the same finishes which are complemented with mongoy wood and Tennessee cotton shades. All of which is manufactured with brass. See collection **20144** on page 144

Symbols	
	Diameter (in cm)
	Width (in cm)
	Height (in cm)
	Projection (in cm)
	Weight (in Kg)
	Max. Wattage per light and number of lights
	Recommended lamp type
	On / off switch
	All G-Lights products are marked with CE label certifying compliances with EMC directives Une EN 60598-1 2005
	Class I luminaires are provided with insulation only and earth connection.
	Class 2 luminaires have double insulation to avoid accidental contact (from users) with parts under tension.
	Class 3 luminaires connected for low voltage use (under 24V) through a safety transformer.
	Int'l protection degree classification against entry of solid bodies (first digit) and liquids (second digit).
	Products manufactured with high quality materials which can be recycled and reused at the end of their useful life.

General information for the use of the catalogue

Technical data

In all the communications take into consideration the following points:

1. Use the complete reference including the finishes and type of shades or glass when different to the photograph.
2. The standard finishes of each model are those which appear on the technical tables of each collection.
3. There may be small alterations in the design due to product optimisation.
4. Our glass is handcrafted. Small bubbles are an example of such and do not mean a defect.
5. Sizes in cm include the shades or glass used in the photograph. They may vary slightly. They do not include chains or other accessories.
6. The weights indicated in kilos include shades or glass and are approximate.
7. All our products are manufactured in our workshops of Barcelona and other points of Spain, as well as the complements (glass, shades...).
8. G-Lights is not legally responsible for possible errors in the printing of this catalogue.

Electrification and assembly

All our models are manufactured according to UNE EN 60598-1 2005 standards and EC directives, including marking. Certifications by independent laboratories. Certifications for UL, Rostest, SASO regulations etc.

Electrifications under BSI, VDE, JIS Standards or others on request and with certified components.

The maximum wattage recommended for each model depends on the shade or the glass according to photograph and may vary if these are different to those presented.

Special or specific electrifications for energy saving is possible in the majority of models. On the technical tables of each page of the catalogue, you will find the most recommended option for each case, according to our criteria and experience.

Bulbs are not included in our prices (except for LED) although they may be sent additionally on request.

All the devices are tested according to the regulations currently in force.

The fixings of each model to walls or ceilings are according to the requirements and standards of each destination country. G-Lights will not be held responsible for the incorrect installations, changes of bulbs or improper handling, of our products and contrary to our indications.

All the devices are manufactured for class I and subject to changes to class II on request.

Shades

Although each collection has the recommended shade/s, our customer's may change it for another model or size or type of material. On pages 280 and 281 we present a wide range of the most used standard shades, although there are other possibilities in our catalogue – enquire about your “ideal” shade and take into consideration the wattages recommended according to the shade.

Quality, finishes and production processes

All our finishes are manufactured with the appropriate protections for their use foreseen on each model. Request for galvanic protections, paints and lacquering for use in extreme weather conditions if you foresee a different use for the model chosen.

Our pieces must not be mounted on damp walls or ceilings, which may affect the quality of our finishes. Make sure that these walls are completely dry before installing them.

G-Lights is aware of the environmental problems and constantly implements the appropriate measures to prevent pollution, reduce and treat waste accordingly, preserving nature from as many negative impacts as possible, and transmits this policy to its suppliers and collaborators, following the ISO 14001 quality and environmental standard.

Design

G-Lights offers one of the world's greatest standard collections, fruit of our years of investments, experience and dedication to lighting.

The great majority of our collections have been designed for specific uses and requirements, although they may be used in many decorations and areas, both traditional and contemporaneous. Our own teams or freelances always search for the best solution for each requirement. Don't hesitate to ask. Our virtual design team can be at your disposal.

Custom made

Depending on the amounts – at G-Lights' discretion – we offer:

- Additional matching options on each collection.
- Special sizes.
- Finishes, shades and glass different to those presented.
- Specific designs per project and manufactured in collaboration with our clients. Don't hesitate to send us your "proposals" and requirements.

Copyright

The content of this catalogue is property of G-Lights and is protected by the international laws of intellectual rights and patents. Its partial or total reproduction or copy without prior express authorisation by G-Lights will be pursued by the competent tribunals in the total extension of the law.

Best value for money

Throughout our catalogue you will find this slogan, ideal perception equivalence of quality-price ratio. Remember that all our production is made in Barcelona, Spain.
