NOTE SULLE FINITURE

Vetro soffiato
Il vetro soffiato è la risultante di una lavorazione artigianale e non industriale e seriale.
Ogni oggetto, per quanta attenzione possa mettere il maestro vetraio, sarà diverso l'uno dall'altro, sia in termini di dimensione che di forma e finitura.
Questa diversità rende ogni oggetto creato dai mastri vetrai, unico ed esclusivo.
Ogni imperfezione, quindi, sia essa in termini di forma, dimensione o finitura, non costituisce certo difetto, ma una caratteristica tipica del lavoro manuale.

NOTE SUL BTOB

Il BtoB di Fabbian (http://b2b.fabbian.com:8080/login.jsf), vi permette di connettervi alla rete aziendale per:
- creare quotazioni per i vostri progetti
- inserire ordini in modo immediato, monitorandone lo stato
- verificare le date di consegna
- visualizzare e scaricare le comunicazioni ufficiali dell'azienda
- consultare e scaricare tutti i propri dati commerciali e amministrativi, nei formati più utilizzati

il tutto in tempo reale, e ovunque vi troviate.

INFORMATION ON THE GOODS' FINISHING

Blown glass
Blown glass is the result of an artisanal process. It is a hand-made product that does not involve any industrial or mass production process.
Despite the abilities of the artisan, every glass will be different from the other in terms of size, shape and finish.
Every glass blown by the "Mastro vetraio" (master of glass) is unique and special.
No imperfection, in terms of size, shape and finish, is a defect, but rather the distinguishing feature of a hand-made product.

INFORMATION ON B2B

Fabbian's B2B platform (http://b2b.fabbian.com:8080/login.jsf) allows you to connect with the company and:
- make quotations for your projects
- efficiently make orders and follow their status
- view the delivery dates
- view and download official communications from Fabbian
- browse and download all administrative information and documents (in the most common formats)

at any time, wherever you are.

TRIPLA

Desall / D. Busato & G. Ciccarese

CONCEPT

I giovani designer Devis Busato e Giulia Ciccarese, vincitori del contest indetto da Fabbian Illuminazione in collaborazione con Desall, hanno dato origine a questa serie di lampade decorative in vetro cristallo.
Tripla nasce dalla forma basica del triangolo e si evolve nell'elemento volumetrico della piramide. La sua forma tetraedrica si propone come completamento alla raccolta Fabbian di lampade dalle forme essenziali. Solida e preziosa, riveste la luce con versatilità, eleganza e modularità, permettendo lo sviluppo di diverse applicazioni e adattandosi a tutti gli ambienti.

The young designers Devis Busato and Giulia Ciccarese, winners of the competition organised by Fabbian Illuminazione in collaboration with Desall, came up with this series of highly decorative lamps in crystal.
The concept behind Tripla is the basic triangle, which evolves, acquiring volume to become a pyramid. Its tetrahedral shape is a fine addition to Fabbian's collections of lamps in essential shapes. Its solid, exquisite design produces a versatile, elegant and modular light for different applications and settings.

Los jóvenes diseñadores Devis Busato y Giulia Ciccarese, ganadores del contest convocado por Fabbian Illuminazione en colaboración con Desall, han creado esta serie de lámparas decorativas de vidrio cristal.
Tripla deriva de la forma básica del triángulo y se desarrolla en el elemento volumétrico de la pirámide. Su forma en tetraedro completa la colección de Fabbian de lámparas con formas esenciales. Sólida y preciosa, viste la luz con versatilidad, elegancia y modularidad para permitir el desarrollo de distintas aplicaciones y adaptarse a todos los ambientes.

Die jungen Designer Devis Busato und Giulia Ciccarese, Sieger des von Fabbian Illuminazione in Zusammenarbeit mit Desall organisierten Contest, haben dieser Dekorationslampenserie aus Kristallglas Leben geschenkt.
Tripla entstand aus der Grundform des Dreiecks und entwickelte sich in das volumetrische Element einer Pyramide. Ihre tetraedrische Form präsentiert sich als Vervollständigung der Fabbian-Lampenkollektion mit essentiellen Formen. Solide und wertvoll verbreitet sie das Licht vielseitig, elegant und modular und ermöglicht so die Entwicklung verschiedener Anwendungen, die sich allen Umgebungen anpassen.

Les jeunes designers Devis Busato et Giulia Ciccarese, vainqueurs du concours organisé par Fabbian Illuminazione en collaboration avec Desall, ont donné naissance à cette série de lampes de décoration en verre cristal.
Tripla, dont la base est triangulaire se développe grâce à l'élément volumétrique de la pyramide. Sa forme tétraédrique complète la collection de lampes Fabbian dont les formes sont essentielles. Ces lampes sont solides et précieuses, leur lumière est universelle, élégante et modulable. Elles s'adaptent à tout type d'environnement et s'intègrent dans tout type de pièce.

Эта коллекция декоративных ламп из хрустального стекла была создана молодыми дизайнерами Девисом Бузато и Джулией Чиккарезе, победителями конкурса, организованного Fabbian Illuminazione при содействии Desall.
Коллекция Tripla основана на базовой форме треугольника, которая эволюционирует в объемный элемент пирамиды. Благодаря своим четырехгранным контурам светильники гармонично дополняют коллекцию ламп геометрических форм Fabbian. Элегантные и практичные светильники, благодаря своей универсальности, утонченности и модульности, гармонично вписываются в интерьеры любого стиля и могут находить самое различное применение, в зависимости от желания и фантазии декоратора.

TRIPLA

Desall / D. Busato & G. Ciccarese

La collezione Tripla è composta da una sospensione, una lampada da tavolo, una lampada da parete, una da soffitto e un incasso in un'unica dimensione ma in tre differenti finiture della struttura: alluminio lucido, grigio antracite e verniciata bronzo. Inoltre è disponibile in sistemi finiti o completamente personalizzabili con struttura delle lampade in tre varianti colore; i rosoni sono disponibili in due dimensioni e nelle tre opzioni di finitura.
Tutte le lampade sono per interno. I diffusori sono in vetro cristallo. L'elettrificazione è a tensione di rete per LED con alimentatore dimmerabile integrato.

The Tripla collection is made up of one hanging lamp, one table lamp, one wall lamp and one ceiling lamp. It also includes a recessed lighting fixture which is flat yet available in three different finishes: polished aluminium, anthracite grey and a bronze plate. It is also available in modular systems and can also be fully personalised with lamps in three colour variants, while the ceiling roses are available in two sizes and in three different finishes.
All the lamps are for indoor use. The diffusers are in crystal. The energy voltage is LED with a incorporated dimmer switch.

La colección Tripla está compuesta por una lámpara colgante, una lámpara de sobremesa, un aplique, un plafón y un foco en un solo tamaño pero con tres acabados distintos para la estructura: aluminio brillante, gris antracita y pintada de color bronce. Asimismo existe en sistemas acabados o completamente personalizables con estructura de las lámparas en tres colores distintos; los rosetones existen en dos tamaños y en las tres opciones de acabado.
Todas las lámparas son de interior. Los difusores son de vidrio cristal. La electrificación es con tensión de red para Led con un alimentador electrónico integrado con intensidad de la luz regulable.

Die Kollektion Tripla besteht aus einer Hängelampe, einer Tischlampe, einer Wandlampe, einer Deckenlampe und einer Einbaulampe mit einer einzigartigen Abmessung, aber in drei verschiedenen Ausführungen der Struktur: poliertes Alu, anthrazitgrau und bronzelackiert. Außerdem ist sie in Fertigsystemen erhältlich oder ganz individuell gestaltbar, wobei die Struktur der Lampen in drei Farbvarianten angeboten wird; die Rosetten sind in zwei Abmessungen und in drei Ausführungen erhältlich.
Alle Lampen sind für Innenbereiche. Die Diffusoren sind aus Kristallglas. Die Elektrifizierung erfolgt über Netzspannung für LED mit integriertem, dimmerbarem Netzteil.

La collection Tripla se compose d'une lampe suspension, d'une lampe de table, d'une applique murale, d'un plafonnier et d'une lampe encastrable d'une seule dimension mais dont la structure est possède trois types de finitions différentes : aluminium brillant, gris anthracite et peinture couleur bronze. Cette lampe est par ailleurs disponible sous la forme de systèmes finis ou totalement personnalisable. La structure des lampes est proposée avec trois couleurs différentes, les rosaces sont proposées dans deux dimensions dans les trois finitions de couleurs.
Toutes les lampes sont conçues pour l'intérieur. Les diffuseurs sont en verre de cristal. Elles utilisent des ampoules à LED et sont munies d'un variateur de lumière.

Коллекция Tripla включает в себя подвесной светильник, настольную лампу, бра, люстру и встраиваемый в стену светильник; размер моделей стандартный, однако они имеют отделку трех видов: глянцевый алюминий, серый антрацит и окраска под бронзу. Кроме того, помимо готовых моделей можно приобрести светильники на заказ: структура ламп может иметь три различных оттенка, розетки доступны в двух размерах и трех вариантах отделки.
Все светильники предназначены для интерьеров. Рассеиватели выполнены из хрустального стекла. Цоколь предназначен для светодиода (LED) и оснащен блоком питания с регулятором яркости.

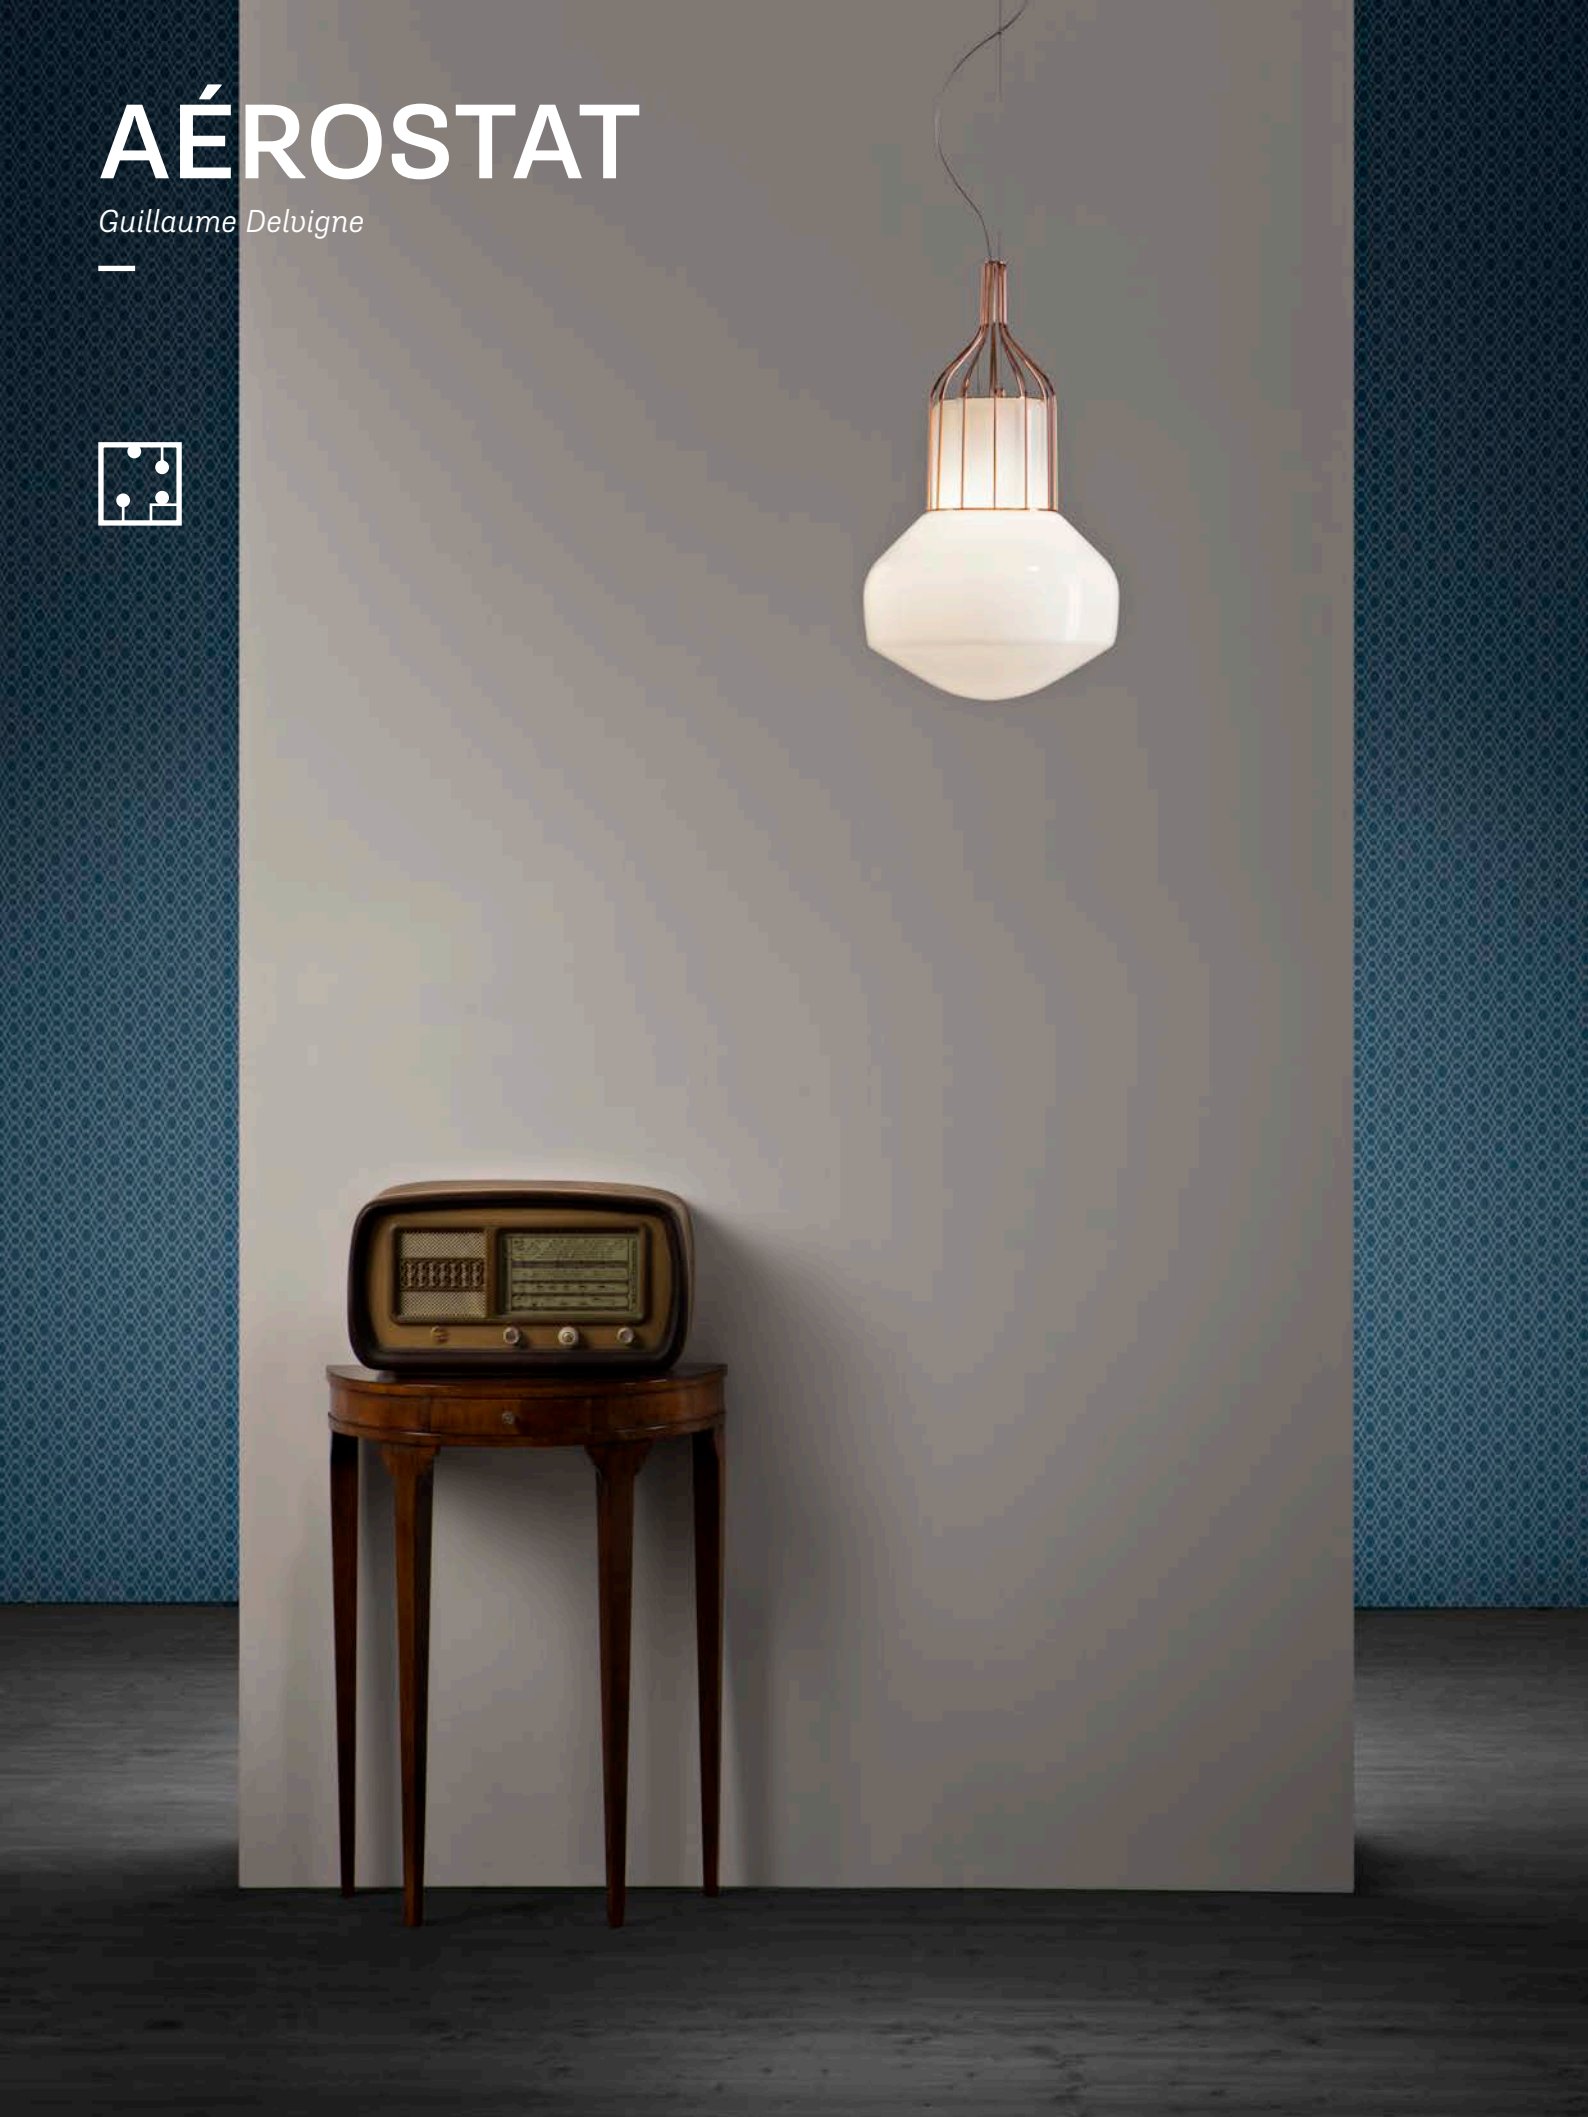
AÉROSTAT

Guillaume Delvigne

—



La collezione Aérostat si compone di sospensioni e lampade da parete e soffitto di tre diverse dimensioni, mentre due sono le lampade da tavolo, due le lampade da terra e due le sospensioni in tre finiture per la base metallica, che può essere nichelata nero, ottonata oppure ramata lucido. Tutte le lampade sono per interno. I diffusori sono in vetro soffiato bianco lucido. L'elettrificazione è a tensione di rete per lampade alogene, fluorescenti e LED.

The Aérostat collection is composed of pendant, wall and ceiling lamps in three different sizes, while the table, floor and pendant lamps and are available in two sizes and in three different finishes for the metal base: black coated nickel, brass or shiny copper. All lamps are designed for indoor use. The diffusers are in shiny white blown glass. The lamp runs on mains power and is suitable for use with halogen, fluorescent and LED bulbs.

La colección Aérostat de lámparas colgantes y apliques y plafones presenta tres tamaños distintos mientras que dos son las lámparas de sobremesa, dos las lámparas de pie y dos las lámparas colgantes en tres acabados para la base metálica, que puede ser niquelada en color negro, latoneada o cobriza brillante. Todas las lámparas son de interior. Los difusores son de vidrio soplado blanco brillante.
La electrificación es con tensión de red para lámparas halógenas, fluorescentes y LED.

Die Kollektion Aèrostat besteht aus Hängelampen und Wand-/ Deckenlampen und umfasst drei verschiedene Größen, während zwei Tischlampen, zwei Bodenlampen und zwei Hängelampen in drei Ausführungen mit Metallbasis präsentiert werden, die schwarz vernickelt, messing- oder kupferbeschichtet sein kann. Alle Lampen sind für innen. Die Diffusoren sind aus geblasenem, weißem, glänzendem Glas. Die Elektrifizierung erfolgt mittels Netzspannung für Halogen-, Fluoreszenz- und LED-Lampen.

La collection Aérostat se compose de suspensions, d'appliques murales et de plafonniers de trois dimensions différentes. , La collection propose également deux lampes de table, deux lampes de sol et deux suspensions dans trois finitions nickel noir, laiton ou encore cuivre brillant au niveau de la base métallique. Toutes les lampes sont conçues pour l'intérieur. Les diffuseurs sont en verre soufflé blanc poli. Ampoules halogènes, fluorescentes et LED alimentées par la tension du réseau.

Коллекция ламп Aérostat на подвесках и настенных/потолочных ламп включает в себя лампы трех различных размеров, в то время, как настольные и напольные лампы представлены двумя моделями, так же, как и навесные лампы, металлическое основание которых может иметь три вида отделки: черную никелированную, латунированную или же глянцевую медную. Настольные лампы представлены в двух размерных вариантах, металлический каркас может иметь никелевое покрытие черного цвета или же латунированное покрытие. Плафоны выполнены из выдувного стекла глянцево-белого цвета. Данная коллекция предназначена для использования внутри помещений. Электрическая часть рассчитана на галогеновую, люминесцентную и светодиодную лампу от сетевого напряжения.

EYES

Matali Crasset

La collezione Eyes è costituita da una sospensione, una lampada da soffitto e una lampade da tavolo per ambienti interni, disponibili in due varianti di colori: vetro soffiato trasparente e vetro soffiato bianco latte acidato.
La sospensione è disponibile con struttura in finitura verniciata bianca opaca e ramata lucido mentre la lampada da soffitto e la lampada da tavolo sono disponibili con struttura in finitura verniciata bianca opaca.

The Eyes collection is made up of a pendant lamp, a ceiling lamp and a table lamp for indoor rooms. Available in two colour variations; transparent and white frosted glass. The pendant lamp is available with an opaque white finish and shiny copper while the ceiling and table lamps are available with an opaque white finish.

La colección Eyes está constituida por una lámpara colgante, un plafón y una lámpara de sobremesa para ambientes internos, disponibles en dos colores diferentes: vidrio soplado transparente y vidrio soplado blanco lechoso esmerilado. La lámpara colgante presenta una estructura con acabado pintado de color blanco mate y cobrizo brillante mientras que el plafón y la lámpara de sobremesa presentan una estructura con acabado pintado de color blanco mate.

Die Kollektion Aèrostat besteht aus Hängelampen und Wand-/Deckenlampen und umfasst drei verschiedene Größen, während zwei Tischlampen, zwei Bodenlampen und zwei Hängelampen in drei Ausführungen mit Metallbasis präsentiert werden, die schwarz vernickelt, messing- oder kupferbeschichtet sein kann. Alle Lampen sind für innen. Die Diffusoren sind aus geblasenem, weißem, glänzendem Glas.

La collection Eyes se compose d'une suspension, d'un plafonnier et d'une lampe de table pour l'intérieur. Ces luminaires sont proposés dans deux couleurs: verre soufflé transparent et verre soufflé blanc lait dépoli. La lampe suspension est proposée avec une structure peinte en blanc opaque ou cuivre brillant. Quant au plafonnier et à la lampe de table, ils sont disponibles avec une structure peinte en blanc opaque.

Коллекция Eyes для внутреннего освещения представлена подвесным светильником, люстрой и настольной лампой, которые доступны в двух цветовых решениях: прозрачном и матовом молочно-белом. Структура подвесного светильника может иметь матовую белую или глянцевую медную отделку, в то время, как структура люстры и настольной лампы отделана матовой белой краской.

LOOP

Constance Guisset

La collezione Loop comprende una sospensione e una lampada da parete e da soffitto. Il corpo illuminante è in vetro soffiato parzialmente sabbiato sul fondo, da installare in ambienti interni. La sospensione è disponibile con struttura in finitura verniciata nera opaca, verniciata bianca opaca, ramata lucido e ottonata brunita mentre la lampada da parete e soffitto è disponibile con struttura in finitura verniciata bianca opaca. L'elettrificazione è a tensione di rete per lampade alogene e LED.

The Loop collection is made up of a pendant lamp, a wall lamp and a ceiling lamp. The shade is in blown glass, partly blown on the base, and is made for indoor use. The pendant lamp is available in an opaque finish in black or white, shiny copper or burnished brass, while the wall and ceiling lamps are available in an opaque white finish. The energy voltage makes these lamps suitable with halogen lamps and LED.

La colección Loop comprende una lámpara colgante, un aplique y un plafón. El cuerpo de iluminación es de vidrio soplado, parcialmente arenado en el fondo, para instalar en ambientes internos.
La lámpara colgante presenta una estructura con acabado pintado de color negro mate, pintado de color blanco mate, cobrizo brillante y latoneado bruñido mientras que el aplique y el plafón presentan una estructura con acabado pintado de color blanco mate. La electrificación es con tensión de red para bombillas halógenas y Led.

Die Kollektion Loop schließt eine Hängelampe, eine Wandlampe sowie eine Deckenlampe ein. Der Leuchtkörper besteht aus am Boden teilweise sandgestrahltem, geblasenem Glas – für Innenbereiche geeignet. Die Hängelampe ist mit einer mattschwarz, mattweiß lackierten und kupferpolierten und messingbrünierten Struktur erhältlich, während die Decken- und Wandlampen mit einer mattweiß lackierten Struktur angeboten werden. Die Elektrifizierung erfolgt über Netzspannung mit Halogen- und LED-Lampen.

La collection Loop se compose d'une lampe suspension, d'une applique et d'un plafonnier. Le corps des lampes est en verre soufflé et partiellement sablé sur le fond. Les lampes doivent être installées à l'intérieur.
La lampe suspension est proposée avec une structure finition peinte en noir opaque, cuivre brillant ou laiton bruni alors que la lampe murale et le plafonnier sont disponibles avec une structure peinte en blanc opaque. L'électrification est à tension de réseau pour des ampoules halogènes et LED.

Коллекция Loop для внутреннего освещения включает в себя подвесной светильник, бра и люстру. Плафон выполнен из выдувного стекла, который частично имеет пескоструйную обработку внутри. Структура подвесного светильника может иметь матовую черную, матовую белую, глянцевую медную или вороненую латунную отделку, в то время, как структура бра и люстры отделана матовой белой краской. Цоколь предназначен для галогенных ламп и светодиодов (LED).

POLAIR

Flynn Talbot

La collezione Polair si compone da una sospensione disponibile in una sola dimensione per interno. Il diffusore è in vetro borosilicato (Pyrex®) sabbiato sul fondo. Polair è disponibile con struttura in finitura verniciata nera opaca e ramata lucido. L'elettrificazione è a tensione di rete per LED con alimentatore dimmerabile integrato.

The Polair collection consists of an indoor pendant lamp available in one size only. The diffuser is in borosilicate glass (Pyrex) with a sandblasted base. Polair is available in an opaque black and shiny copper finish. The energy voltage is LED with a incorporated dimmer switch.

La colección Polair está compuesta por una lámpara colgante disponible en único tamaño para interior. El difusor es de vidrio borosilicato (Pyrex®) arenado en el fondo. Polair existe con estructura con acabado pintado negro mate y cobrizo brillante. La electrificación es con tensión de red para Led con un alimentador electrónico con intensidad de la luz regulable.

Die Kollektion Polair besteht aus einer Hängelampe in nur einer Abmessung für Innenbereiche. Der Diffusor besteht aus Borsilicatglas (Pyrex®), der am Boden sandgestrahlt ist. Polair ist auch mit einer mattschwarz lackierten und kupferpolierten Struktur erhältlich. Die Elektrifizierung erfolgt über Netzspannung für LED mit integriertem, dimmerbarem Netzteil.

La collection Polair se compose d'une suspension proposée en une seule dimension pour l'intérieur. Le diffuseur est en verre de borosilicate (Pyrex®) sablé sur le fond. Polair est proposée avec une structure peinte en noir opaque ou cuivré brillant. L'électrification est à tension de réseau pour ampoules à LED et ballast à intensité variable intégré.

Коллекцию Polair представляет одноразмерная подвесная люстра для внутреннего освещения помещений. Рассеиватель выполнен из боросиликатного стекла (Pyrex®) с пескоструйной обработкой внутри. Люстры Polair могут иметь матовую черную или глянцевую медную отделку. Цоколь предназначен для светодиода (LED) со встроенным блоком питания с регулятором яркости.

Technical

VENUS

FE Design

La collezione è costituita da apparecchi ad incasso.
Le strutture metalliche, fisse o orientabili, sono in alluminio lucidato o verniciato bianco. La loro forma semplice e pura li rende molto versatili, adatti ad ogni tipo di ambiente pubblico o privati, grazie anche alla vasta scelta di sorgenti luminose. La caratteristica di alcuni faretti è la dimmerazione che, oltre ad abbassare la luminosità ne modula il colore rendendo la luce più calda o fredda.
L'elettrificazione è a tensione di rete per LED.

The collection is made up of recessed lighting fixtures.
The metallic structures can be either fixed or adjustable, and are in polished aluminium or powder-coated in white. Their simple, pure shape makes these lamps very versatile and suitable for use in any type of public space or the home, also due to the fact that they are suitable for use with many different light sources. Some spot lights are dimmerable which not only allows the brightness to be turned down but also changes their colour to create a warm or cold light. The lamps run on mains power with LED bulbs.

La colección está compuesta por focos de empotrar. Las estructuras metálicas, fijas u orientables, son de aluminio abrillantado o pintado de color blanco. Sus formas sencillas y puras los convierten en elementos muy versátiles, idóneos para todos los tipos de ambientes, públicos o privados, también por la amplia elección de fuentes luminosas. La característica de algunos focos es la regulación de la luz, que además de disminuir la luminosidad modula su color por lo que la luz resulta más cálida o fría. La electrificación es con tensión de red para Led.

Die Kollektion besteht aus Einbau-Beleuchtungen. Die festen oder ausrichtbaren Metallstrukturen bestehen aus poliertem oder weiß lackiertem Alu. Ihre einfache und reine Form gestaltet sie perfekt für jede Art von öffentlicher oder privater Umgebung, auch dank der großen Auswahl an Leuchtquellen. Die Eigenschaft einiger Spots ist die Dimmerung, die nicht nur die Helligkeit senkt, sondern die Farbe moduliert und sie so wärmer oder kälter gestaltet.
Die Elektrifizierung erfolgt über Netzspannung bei LED-Lampen.

La collection se compose d'appareils à encastrement. Les structures métalliques, fixes ou orientables sont en aluminium brillant ou peintes en blanc. La forme simple et nette de ces objets universels s'adapte à tout type d'établissement public ou privé, grâce également à un vaste choix de sources de lumière. Certains spots sont munis d'un variateur de lumière, capable de moduler l'intensité de lumière en offrant une couleur chaude ou froide. Cette collection est équipée d'ampoules LED.

Коллекция представляет собой встраиваемые в стену светильники. Фиксированные или вращающиеся металлические структуры выполнены из отполированного алюминия или окрашены в белый цвет. Благодаря простой и правильной форме светильников, а также их широкому выбору лампы этой коллекции универсальны и подходят для любых интерьеров, будь то частные дома или общественные помещения. Некоторые точечные светильники, помимо регулятора яркости, оснащены также регулятором цвета, благодаря которому возможно получить более теплое или холодное освещение. Цоколь предназначен для светодиода (LED).

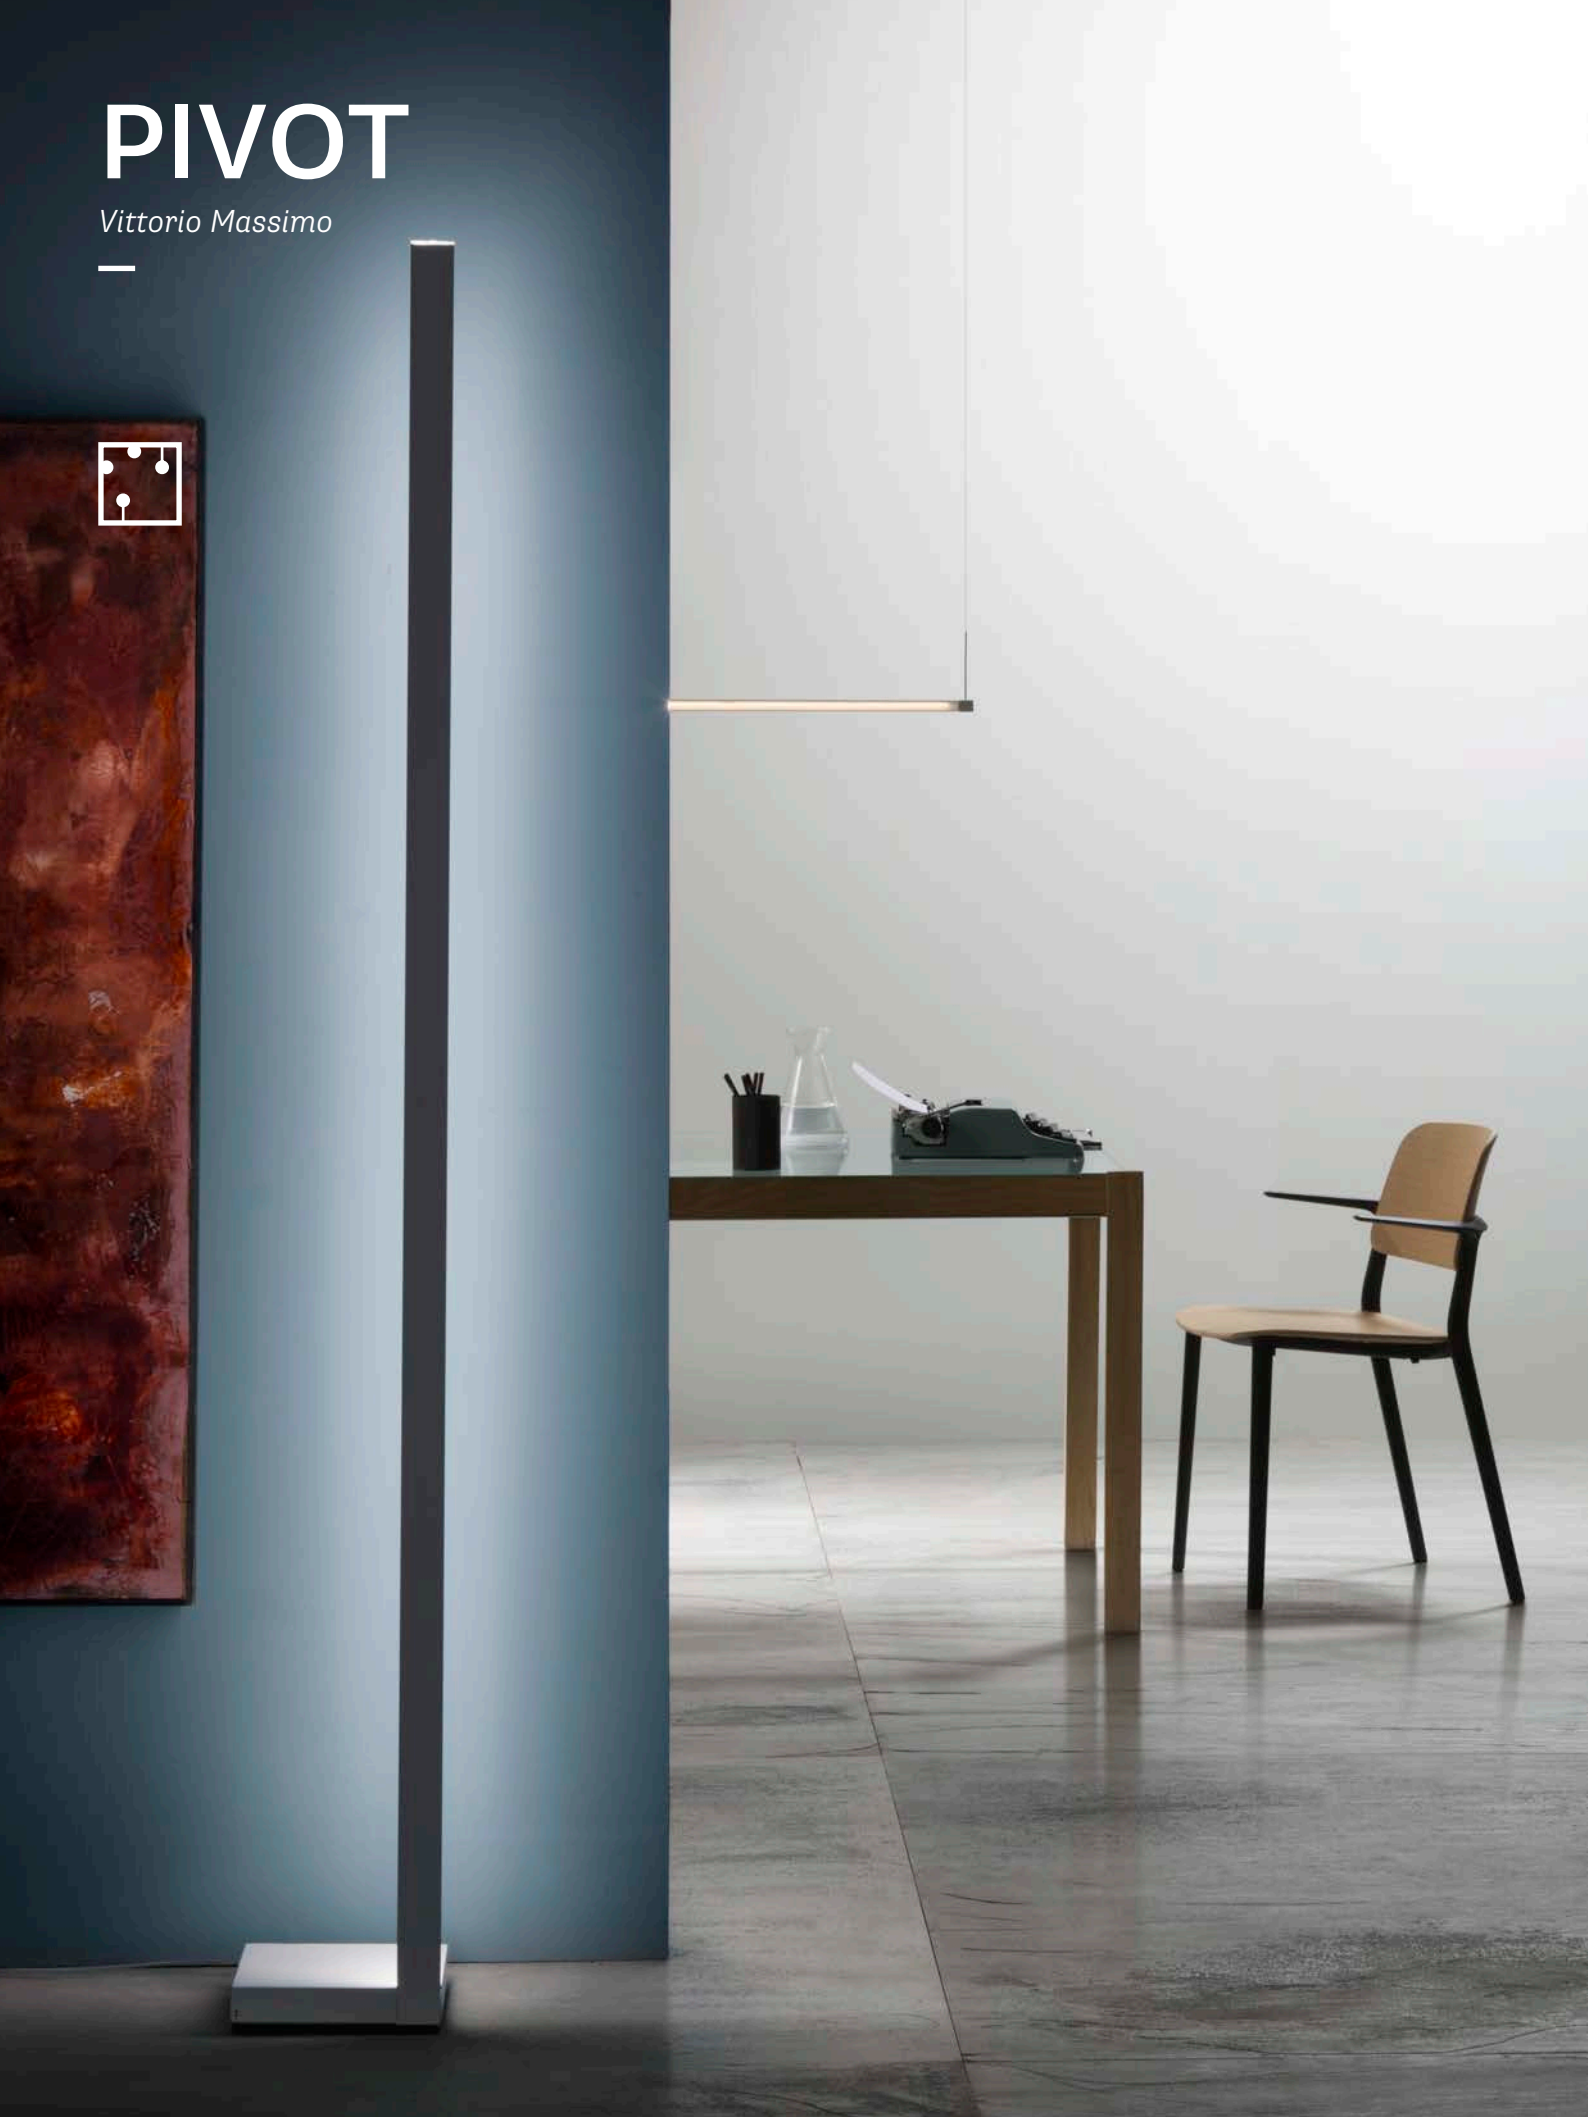
PIVOT

Vittorio Massimo



La collezione Pivot comprende una lampada da terra, tre applique di diversa lunghezza per parete e soffitto e una sospensione, a richiesta le lunghezze sono personalizzabili. Le lampade sono state progettate per ambienti interni, disponibili in alluminio verniciato bianco, grigio antracite e grigio chiaro, la luce viene convogliata dalle barre luminose. Per la piantana, con alimentatore dimmerabile integrato, e per la sospensione, l'elettrificazione è a tensione di rete per LED. Per le lampade da parete e da soffitto, l'elettrificazione è a bassa tensione (24Vdc a LED) con alimentatore remoto.

The Pivot collection is made up of a floor lamp, and three wall and ceiling appliques in various sizes, plus one hanging lamp. All lengths can be completely customized on request. The lamps are designed for indoor use, and are available in white, dark grey or light grey aluminium, the light is directed through the light bars.
For the floor lamp, which has a built-in dimmer switch, and for the hanging lamp, the energy voltage is LED, while for the wall and ceiling lamp, the energy voltage is low (24Vdc, LED) and comes with a remote power pack.

La colección Pivot comprende una lámpara de pie y tres apliques con distintas medidas de largo para paredes y techos y una lámpara colgante; bajo pedido las medidas de largo se pueden personalizar. Las lámparas se han diseñado para ambientes internos, disponibles en aluminio pintado de color blanco o gris antracita y gris claro; la luz se transmite por las barras luminosas. Para la lámpara de pie, con alimentador integrado regulable en intensidad y para la lámpara colgante, la electrificación es con tensión de red para LED. Para los apliques y plafones, la electrificación es de baja tensión (24Vcc con LED) con alimentador a distancia.

Die Kollektion Pivot schließt eine Bodenlampe und drei Wandlampen unterschiedlicher Länge für die Wand und Decke sowie eine Hängelampe ein; auf Wunsch sind die Längen individuell gestaltbar. Die Lampen wurden für Innenbereiche entwickelt und sind aus weiß oder anthrazit- oder hellgrau lackiertem Alu erhältlich, das Licht wird von den Leuchtstangen geleitet.
In der Bodenlampe mit einem integrierten dimmerbaren Netzteil und für die Hängelampe erfolgt die Elektrifizierung per Netzstrom für LED. Bei den Wand- und Deckenlampen erfolgt die Elektrifizierung per Niederspannung (24V mit LED) mit distanziertem Netzteil.

La collection Pivot se compose d'une lampe sur pied et de trois appliques de différentes longueurs pour mur et plafond mais aussi d'une lampe suspension. Les longueurs sont personnalisables sur demande. Ces luminaires ont été conçus pour l'intérieur. Ils sont proposés en aluminium peint en blanc, gris anthracite ou gris clair. La lumière est dirigée par des barres lumineuses. Concernant la lampe sur pied, avec variateur de lumière intégré, et la suspension, l'électrification est à la tension de réseau pour des ampoules à LED. Quant aux appliques et aux plafonniers, l'électrification est à basse tension (24Vdc à LED) et le ballast à distance.

Коллекция Pivot для внутреннего освещения помещения включает в себя напольный светильник, три бра различной длины для размещения на стене и на потолке и подвесной светильник; длина бра может быть изменена по заказу клиента. Светильники предназначены для интерьеров и выполнены из алюминия белого цвета, оттенка серого антрацита и светло-серого цвета. Свет подается через светящиеся стержни. Цоколь торшера и подвесного светильника оснащен встроенным блоком питания с регулятором яркости и предназначен для светодиодов (LED). У бра и люстры цоколь предназначен для ламп низкого напряжения (24V для светодиодов) с удаленным блоком питания.

PUÀ

Pellegrini + Mengato Design

La collezione Puà si compone da un'applique disponibile in una sola dimensione in bianco, nero e brunito satinato, da installare in ambienti interni. Il corpo illuminante è in alluminio verniciato, la luce viene diffusa dal taglio frontale e dai lati attraverso due diffusori in policarbonato. L'elettrificazione è a tensione di rete per LED.

The Puà collection is made up of an applique, available in one size only, in white, black or a satin burnished finish, suitable for indoor use. The shade is in lacquered aluminium and the light is diffused from the cut at the front and from the sides through two polycarbonate diffusers. The lamp runs on mains power and is suitable for use with LED bulbs.

La colección Puà está compuesta por un aplique disponible en un único tamaño de color blanco, negro o bruñido satinado para instalar en ambientes internos. El cuerpo de iluminación es de aluminio pintado, la luz se difunde por el corte frontal y por los lados mediante dos difusores de policarbonato. La electrificación es con tensión de red para Led.

Die Kollektion Puà besteht aus einer Wandlampe in nur einer Abmessung, in Weiß oder schwarz und satiniert brüniert, und ist für Innenbereiche gedacht. Der Leuchtkörper besteht aus lackiertem Aluminium, das Licht wird durch den frontalen Einschnitt und die Seiten durch zwei Polycarbonat-Diffusoren verbreitet. Die Elektrifizierung erfolgt über Netzspannung bei LED-Lampen.

La collection Puà se compose d'une applique, proposée en une seule dimension, en blanc, noir et brun satiné pour les intérieurs. Le corps d'éclairage est en aluminium peint.
La lumière est diffusée par la coupe frontale et par les côtés à travers deux diffuseurs en polycarbonate. L'électrification est à la tension de réseau pour ampoules à LED.

Коллекцию Puà представляют встраиваемые светильники одного размера белого цвета, оттенка черный, а также из тонированного сатинированного стекла для внутреннего освещения помещений. Арматура выполнена из окрашенного алюминия, свет подается из фронтального разреза и двух боковых рассеивателей, изготовленных из поликарбоната. Цоколь предназначен для светодиода (LED).

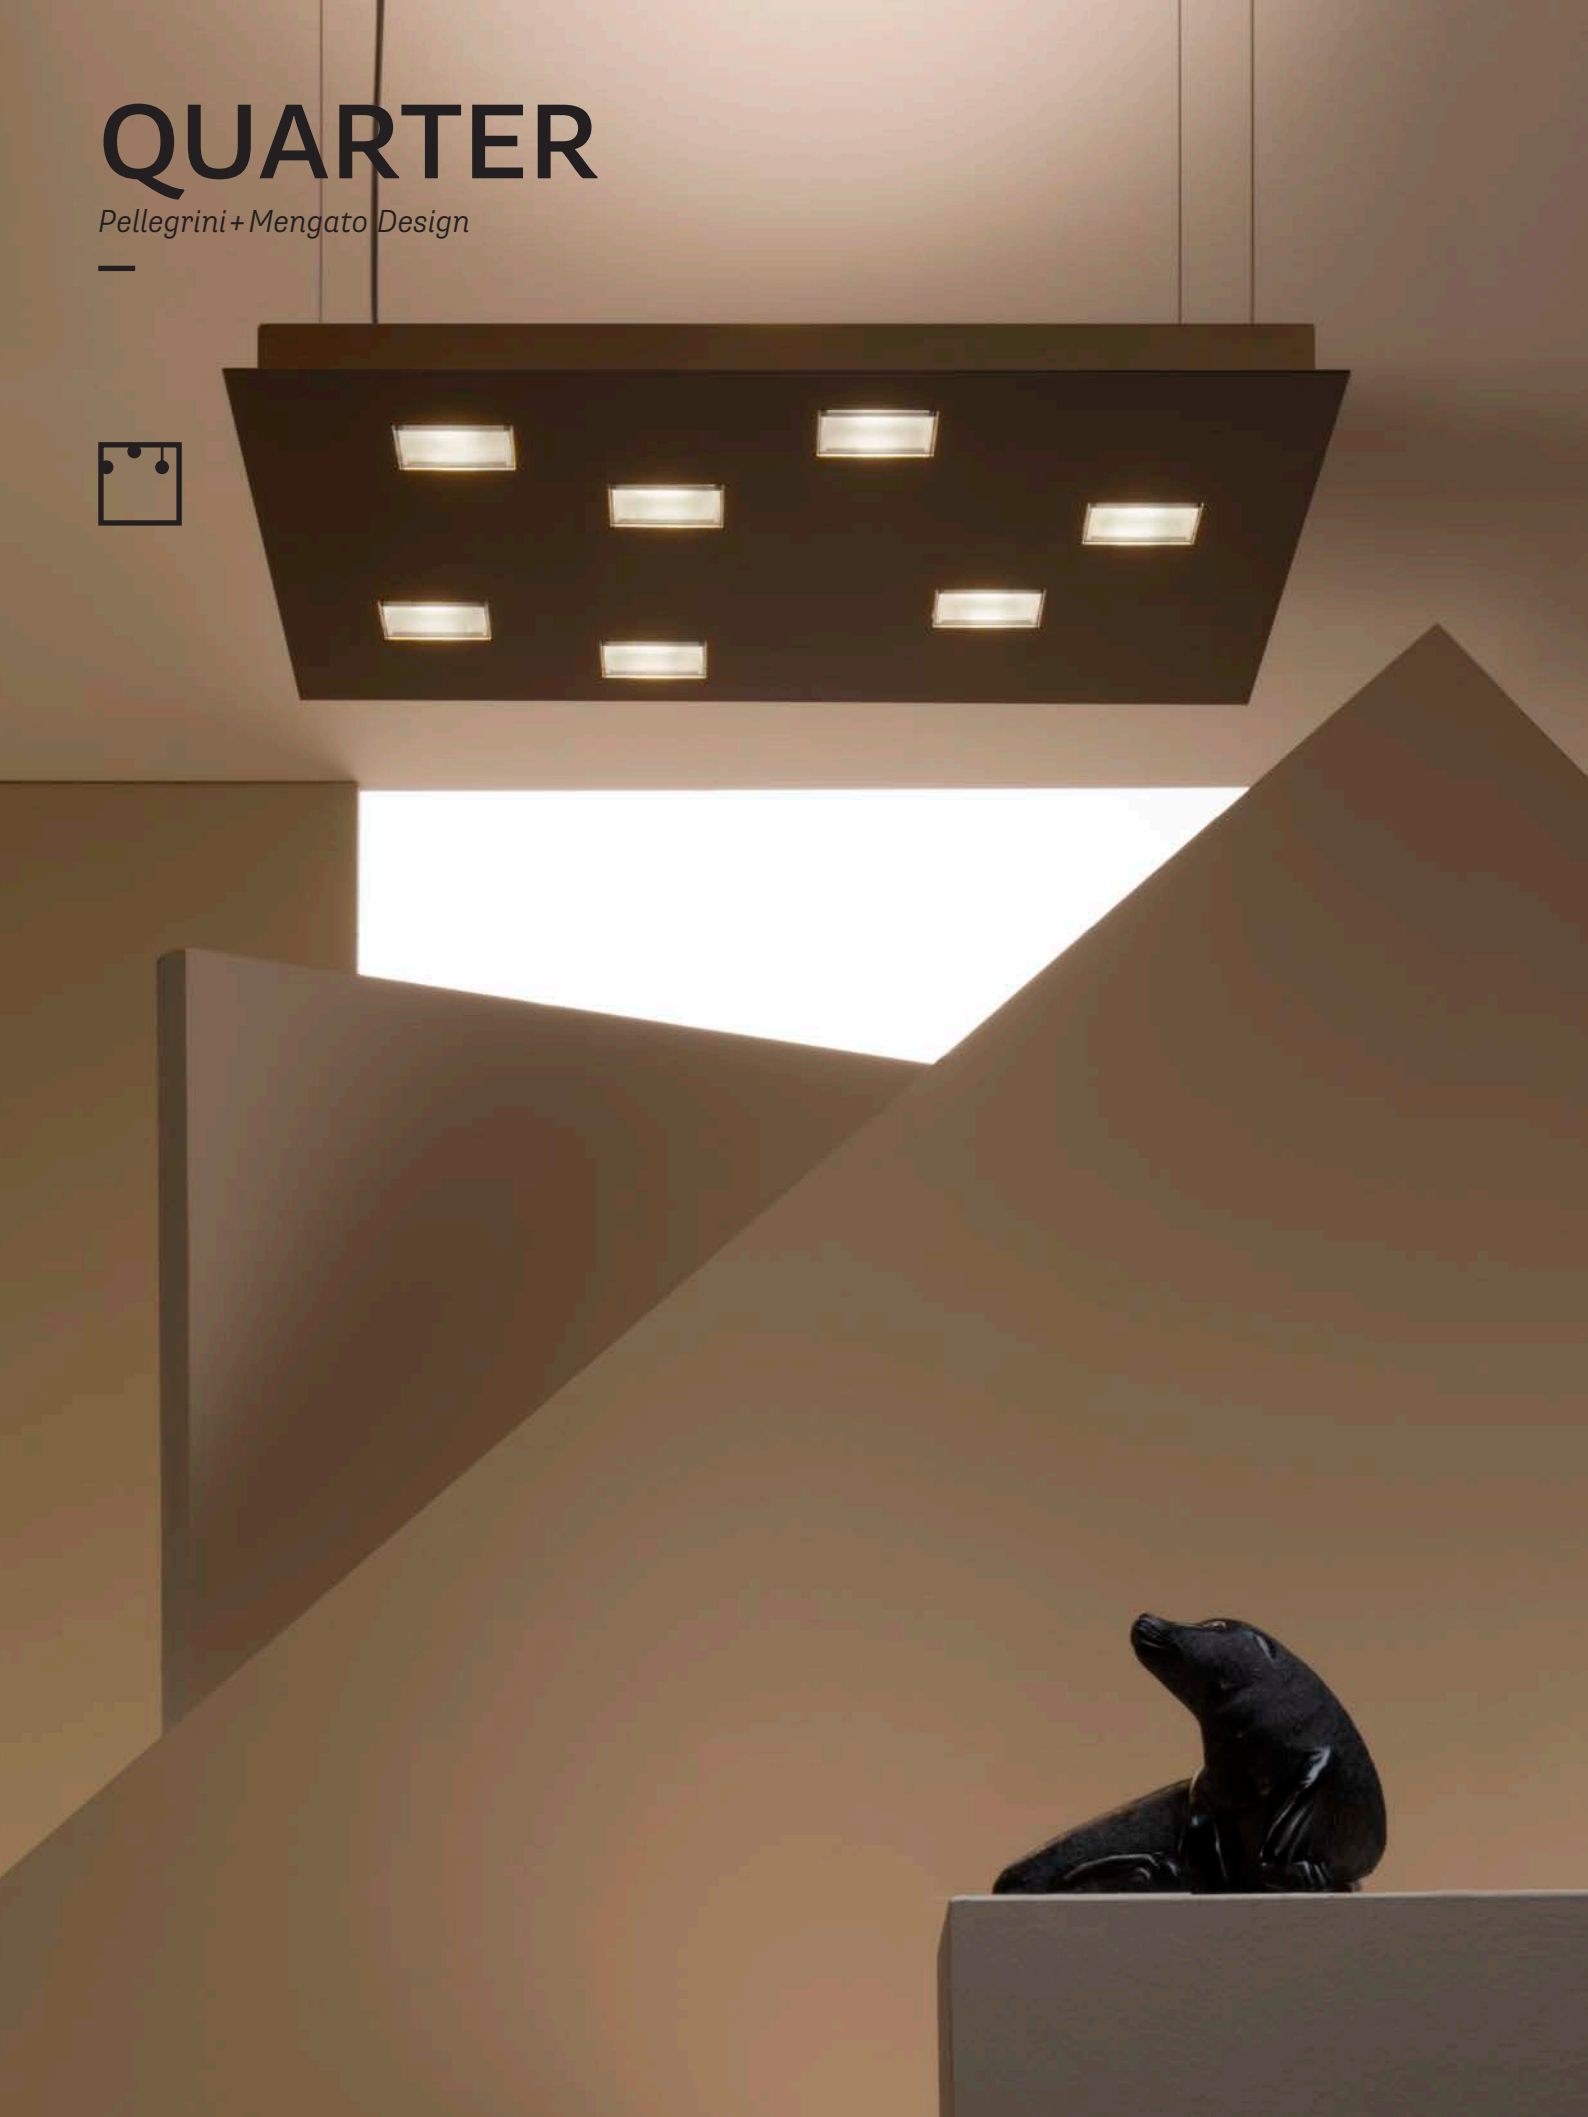
QUARTER

Pellegrini + Mengato Design



La collezione Quarter è costituita da lampade a parete e soffitto per interno, disponibili in sette diverse dimensioni, e da due sospensioni per interno. Il corpo illuminante è in alluminio bianco verniciato, nero verniciato e brunito satinato, la luce viene diffusa dai piccoli cubi in policarbonato. L'elettrificazione è a tensione di rete per LED.

The Quarter collection is made up of indoor wall and ceiling lamps, available in seven different sizes, plus two hanging lamps, also for indoor use. The shade is in white or black lacquered aluminum, or aluminum with a satin-burnished finish and the light is diffused through small polycarbonate cubes. The energy voltage is LED.

La colección Quarter está constituida por apliques y plafones de interior, disponibles en siete tamaños distintos, y por dos lámparas colgantes de interior. El cuerpo de iluminación es de aluminio blanco pintado, negro pintado y bruñido satinado, la luz se difunde mediante pequeños cubos de policarbonato. La electrificación es con tensión de red para Led.

Die Kollektion Quarter besteht aus Wand- und Deckenlampen für Innenbereiche und ist in sieben verschiedenen Abmessungen erhältlich; ebenso werden zwei Hängelampen für Innenbereiche angeboten. Der Leuchtkörper besteht aus weiß oder schwarz lackiertem Alu und satiniert brüniert, das Licht wird von den kleinen Polycarbonat-Würfeln verbreitet. Die Elektrifizierung erfolgt über Netzspannung bei LED-Lampen.

La collection Quarter se compose d'appliques/ plafonniers pour l'intérieur. Elle est proposée dans sept dimensions différentes. Cette collection est complétée par deux suspensions d'intérieur. Le corps d'éclairage est peint couleur aluminium, noir et brun satiné. Sa lumière est diffusée grâce aux petits cubes en polycarbonate. L'électrification est à la tension de réseau pour ampoules à LED.

Коллекция Quarter представлена настенными и потолочными лампами семи размеров и двумя подвесными светильниками для интерьеров. Арматура изготовлена из алюминия белого, черного лакированного и воронено-сатинированного цветов. Свет рассеивается из маленьких кубов, выполненных из поликарбоната. Цоколь предназначен для светодиода (LED).

MULTISPOT BELUGA

Marc Sadler

—

La collezione Multispot Beluga si compone di sospensioni per interno ed esterno. I rosoni, di forma e dimensioni diverse, sono in alluminio verniciato a polveri bianchi e possono essere forniti con le forature massime previste, oppure possono essere personalizzati su richiesta.
I diffusori di Beluga, forniti in 3 lunghezze di cavo elettrico, sono costituiti da sfere in cristallo trasparente.
L'elettrificazione è a bassissima tensione (12V) per lampade alogene e lampade LED.

The Multispot Beluga collection is made up of hanging lamps for indoor and outdoor use. The ceiling roses, in different shapes and sizes, are made in white painted aluminium and come either with the standard maximum number of holes, or customised on request. The diffusers of the Beluga series, available in 3 lengths of electrical cable, are composed of transparent lead crystal spheres.
The lamps run on a very low voltage (12V) and are suitable for halogen and LED bulbs.

La colección Multispot Beluga está compuesta por lámparas colgantes de interior y exterior. Los rosetones, con formas y tamaños diferentes, son de aluminio pintado con polvos blancos y se pueden suministrar con los orificios máximos previstos o bien se personalizan bajo pedido. Los difusores de Beluga, suministrados con un cable eléctrico en 3 longitudes, están constituidos por esferas de cristal transparente.
La electrificación es con tensión muy baja (12V) para bombillas halógenas y bombillas LED.

Die Kollektion Multispot Beluga besteht aus Hängelampen für Innenbereiche und Aussbereiche. Die Rosetten mit unterschiedlichen Formen und Abmessungen sind aus weiß pulverlackiertem Alu und können mit den vorgesehenen Höchstbohrungen geliefert oder nach Wunsch individuell gestaltet werden.
Die Diffusoren von Beluga in 3 Stromkabellängen bestehen aus transparenten Kristallglaskugeln.
Die Elektrifizierung erfolgt mit Niederspannung (12 V) für Halogenlampen und LED-Lampen.

La collection Beluga se compose de suspensions pour l'intérieur et l'extérieur. Les rosaces, de différentes formes et dimensions sont en aluminium peint en blanc par poudre et peuvent être fournies avec les trous maximums prévus, ou personnalisées sur demande. Les diffuseurs de Beluga, fournis avec 3 longueurs de câble électrique se composent de sphères en cristal transparent. Les ampoules halogènes et LED possèdent une alimentation à très basse tension (12V).

Коллекция Multispot Beluga состоит из подвесок для внутренних помещений и внешний.
Розетки разных форм и размеров из алюминия с белой порошковой окраской могут поставляться с максимально широкими отверстиями, или могут производиться под ваш индивидуальный заказ.
Рассеиватели люстры Beluga имеют электрический шнур 3-х разных длин, состоят из сфер из прозрачного кристалла.
Электрическая часть рассчитана на галогенные лампы очень низкого напряжения (12V) и светодиодные лампы.

MULTISPOT POLAIR

Flynn Talbot

La collezione Multispot Polair si compone di sospensioni per interno ed esterno. I rosoni, di forma e dimensioni diverse, sono in alluminio verniciato a polveri bianchi e possono essere forniti con le forature massime previste, oppure possono essere personalizzati su richiesta. I diffusori di Polair, forniti in 3 lunghezze di cavo elettrico, sono costituiti da elementi conici in vetro borosilicato (Pyrex®) sabbiato sul fondo e tappo in finitura verniciata nera opaca e ramata lucida. L'elettrificazione è a tensione di rete per LED.

The Multispot Polair collection is made up of hanging lamps for indoor and outdoor use. The ceiling roses, in different shapes and sizes, are made in white painted aluminium and come either with the standard maximum number of holes, or customised on request. The Polair diffusers come in three electric cable lengths, and are composed of borosilicate (Pyrex®) glass cylindrical elements, with a sandblasted base, and have a cap with an opaque black and shiny copper finish. The lamp runs on mains power and is suitable for use with LED bulbs.

La colección Multispot Polair está compuesta por lámparas colgantes de interior y exterior. Los rosetones, con formas y tamaños diferentes, son de aluminio pintado con polvos blancos y se pueden suministrar con los orificios máximos previstos o bien se personalizan bajo pedido. Los difusores de Polair, suministrados con un cable eléctrico en tres medidas de largo, están constituidos por elementos cónicos de vidrio borosilicato (Pyrex®) arenado en el fondo y tapón con acabado pintado negro mate y cobrizo brillante. La electrificación es con tensión de red para Led.

Die Kollektion Multispot Polair besteht aus Hängelampen für Innenbereiche und Aussbereiche. Die Rosetten mit unterschiedlichen Formen und Abmessungen sind aus weiß pulverlackiertem Alu und können mit den vorgesehenen Höchstbohrungen geliefert oder nach Wunsch individuell gestaltet werden. Die Diffusoren von Polair, die in 3 Stromkabellängen geliefert werden, bestehen aus kegelförmigen Elementen aus Borsilicatglas (Pyrex®), die am Boden sandgestrahlt sind und einem mattschwarz und kupferpolierten Verschluss. Die Elektrifizierung erfolgt über Netzspannung bei LED-Lampen.

La collection Multispot Polair se compose de suspensions pour l'intérieur et l'extérieur. Les rosaces, de forme et de dimensions différentes, sont en aluminium peint par poudre blanche et peuvent être fournies avec les trous maximums prévus. Elles peuvent également être personnalisées. Les diffuseurs de Polair, proposés dans 3 longueurs de fil électrique différentes, se composent d'éléments coniques en verre de borosilicate (Pyrex®) sablé sur le fond et d'une couverture de finition peinte en noir opaque ou cuivre brillant. L'électrification est à la tension de réseau pour des ampoules à LED.

Линейка Multispot Polair представляет подвесные светильники для внутреннего освещения помещений и внешний. Розетки, выполненные из алюминия с белым порошковым покрытием, поражают богатством своих форм и размеров. Розетки могут поставляться с максимальным количеством отверстий или же изготавливаться по индивидуальному заказу. Световые рассеиватели Polair оборудованы кабелем разной длины (3 размера) и включают в себя конические элементы из боросиликатного стекла (Pyrex®) с пескоструйной обработкой внутри и колпачок с матовой черной и глянцевой медной отделкой. Цоколь предназначен для светодиода (LED).

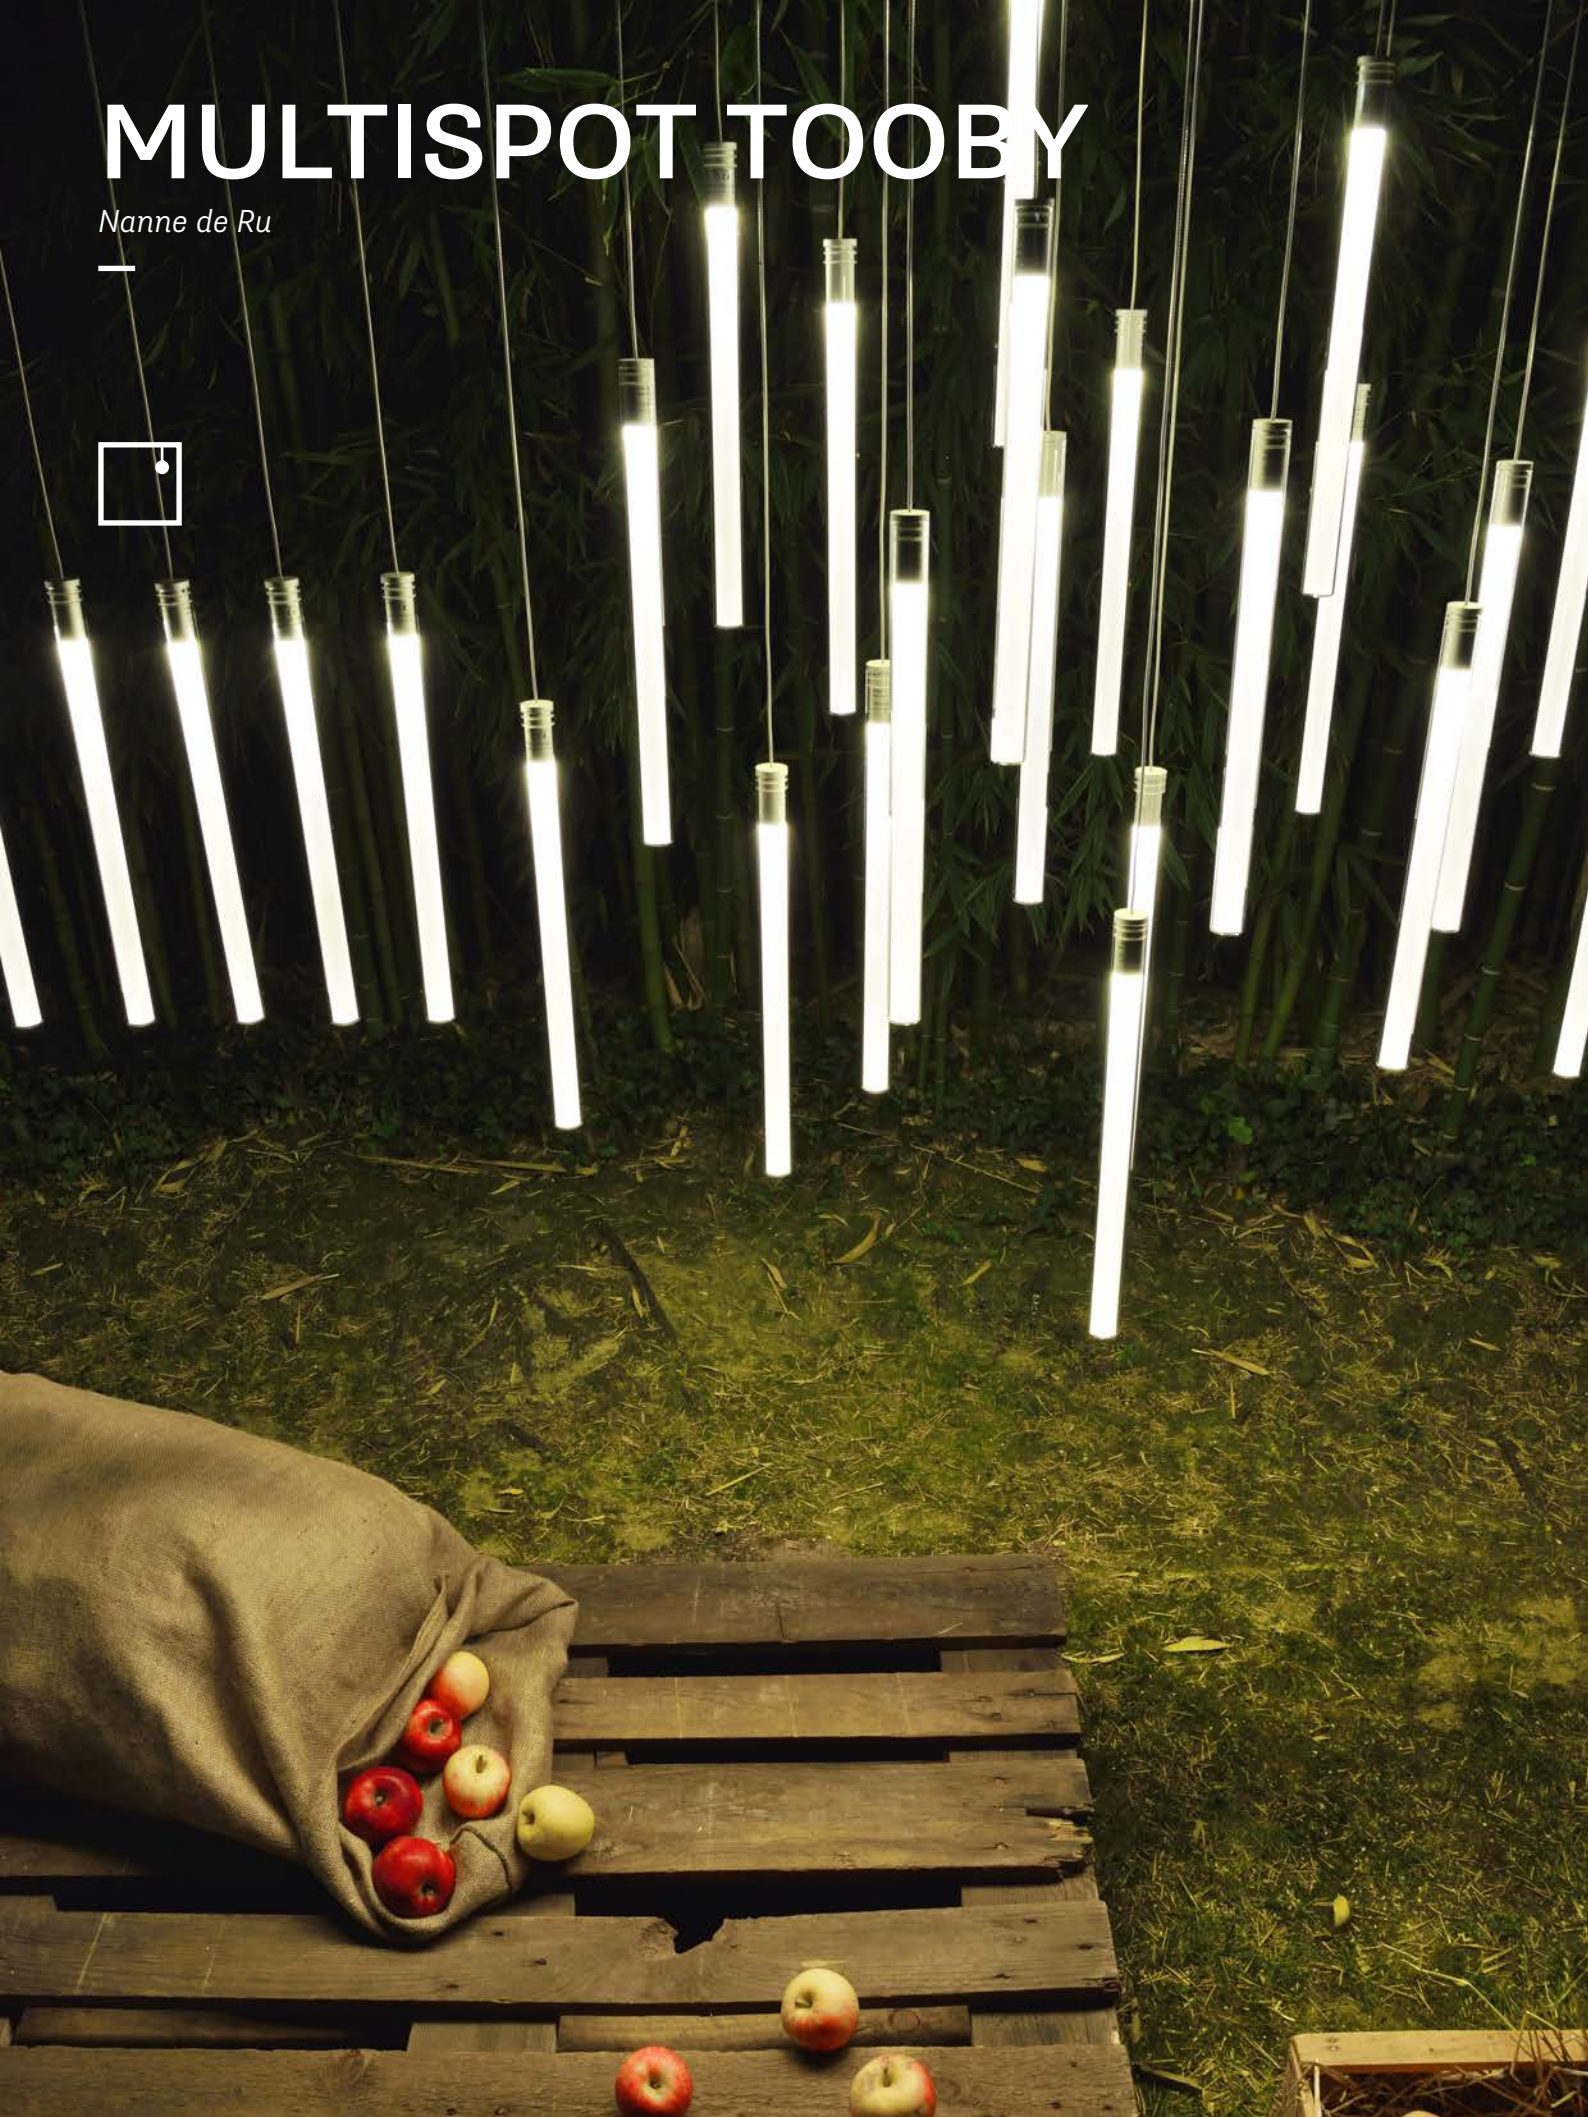
MULTISPOT TOOBY

Nanne de Ru



La collezione Multispot Tooby si compone di sospensioni per interno ed esterno. I rosoni, di forma e dimensioni diverse, sono in alluminio verniciato a polveri bianchi e possono essere forniti con le forature massime previste, oppure possono essere personalizzati su richiesta. I diffusori di Tooby, forniti in 3 lunghezze di cavo elettrico, sono costituiti da elementi cilindrici in vetro borosilicato (Pyrex®) e tappo in finitura anodizzata e ramata lucida, con all'interno un elemento cilindrico plastico rigato per diffondere la luce omogeneamente lungo tutto il tubo. L'elettrificazione è a tensione di rete per Led.

The Multispot Tooby collection is made up of hanging lamps for indoor and outdoor use. The ceiling roses, in different shapes and sizes, are made in white painted aluminium and come either with the standard maximum number of holes, or customised on request. The diffusers of the Tooby series, available in 3 lengths of electrical cable, are composed of cylindrical elements in borosilicate glass (Pyrex®) and a cap with an anodised and shiny copper finish, with a ribbed plastic cylindrical element inside to diffuse the light evenly along the entire tube. The lamp runs on mains power and is suitable for use with LED bulbs.

La colección Multispot Tooby está compuesta por lámparas colgantes de interior y exterior. Los rosetones, con formas y tamaños diferentes, son de aluminio pintado con polvos blancos y se pueden suministrar con los orificios máximos previstos o bien se personalizan bajo pedido. Los difusores de Tooby, suministrados con un cable eléctrico en 3 longitudes, están constituidos por elementos cilíndricos de vidrio borosilicato (Pyrex®) y tapón con acabado anodizado y cobrizo brillante, con en el interior un elemento cilíndrico de plástico rayado para difundir la luz uniformemente a lo largo de todo el tubo. La electrificación es con tensión de red para Led.

Die Kollektion Multispot Tooby besteht aus Hängelampen für Innenbereiche und Aussbereiche. Die Rosetten mit unterschiedlichen Formen und Abmessungen sind aus weiß pulverlackiertem Alu und können mit den vorgesehenen Höchstbohrungen geliefert oder nach Wunsch individuell gestaltet werden. Die Diffusoren von Tooby in drei Stromkabellängen bestehen aus zylindrischen Elementen aus Borosilikatglas (Pyrex®) und einem eloxierten kupferpolierten Verschluss mit einem gerillten inneren Kunststoffzylinder, um das Licht gleichmäßig entlang des ganzen Rohrs zu verteilen. Die Elektrifizierung erfolgt über Netzspannung bei LED-Lampen.

La collection Multispot Tooby se compose de suspensions pour l'intérieur et l' extérieur. Les rosaces, de différentes formes et dimensions, sont en aluminium peint en blanc par poudre et peuvent être fournies avec les trous prévus au maximum ou personnalisées sur demande. Les diffuseurs de Tooby, fournis avec 3 longueurs de câble électrique, sont constitués par des éléments en verre borosilicate (Pyrex®) et par une couverture finition anodisée cuivre brillant, avec un élément cylindrique en plastique rayé à l'intérieur pour une lumière homogène le long du tube. Les LED sont alimentées par la tension du réseau.

Коллекция Multispot Tooby состоит из подвесок для внутренних помещений и внешний. Розетки разных форм и размеров из алюминия с белой порошковой окраскоймогут поставляться с максимально широкими отверстиями, или могут производиться под ваш индивидуальный заказ. Рассеиватели люстры Tooby имеют электрический шнур 3-х разных длин, состоят из цилиндрических элементов из боросиликатного стекла (Pyrex®) и колпачка с анодированной и глянцевой медной отделкой; внутри имеется пластиковый цилиндр в полоску для однородного рассеивания света по всей длине лампы. Электрическая часть рассчитана на светодиодные лампы от сети напряжения.

Classe di isolamento
/ Class of insulation

Ai fini della protezione elettrica, gli apparecchi sono classificati in base ad indicazioni CEE.

For electric production purposes the fixtures are classified in accordance with EEC guidelines.

Para la protecíon electrica los aparatos se clasifican en base a las indicaciones de la CEE.

Die Geräte sind hinsichtlich der elektrischen Absicherung aufgrund der EWG-Normen klassifiziert.

Concernant la protection électrique, les appareils sont classés selon les indications CEE.

С целью электрозащиты все приборы классифицированы в соответствии с инструкциями CEE.

Classe I Isolamento funzionale in ogni parte, provvisto di messa a terra, o con morsetto se fisso o con conduttore e relativa spina con contatto di terra, se mobile.

Class I Functional insulation in every part and ground terminal or clamp in the unit is fixed, or with conductor and relative plug with ground contact if the unit is mobile.

Clase I Aislamiento funcional en cada parte provista de toma tierra o con pinza fijada, con cable y terminal con contacto de tierra si esmovil.

Klasse I Isolierung jedes Bestandteiles mit Erdung, bwz. mit Klemme falls festmontiert oder Drahtleitung und Schuko-Stecker falls beweglich.

Classe I Isolement fonctionnel de toutes les composantes, avec mise à la terre ou borne si l'appareil est fixe; avec conducteur et fiche avec contasct à la terre si l'appareil est mobile.

Класс I Функциональная изоляция в каждой детали, оснащенная заземлением или с помощью зажима для стационарных изделий, или через проводник и соответствующую вилку с контактом в землю для переносных изделий.

Classe II Doppio isolamento e/o isolamento rinforzato in ogni parte e senza dispositivo di messa a terra.

Class II Double insulation and/or reinforced insulation in every part and without ground devices.

Clase II Doble aislamiento Y/O aislamiento renforzado en cada parte i sin toma tierra.

Klasse II Doppelte isolierung, bzw.verstärkte isolierung der Teile, ohne Vorrichtung Für erdung.

Classe II Double isolement et/ou isolement renforcé de toutes les composantes et sans dispositif de mise à la terre.

Класс II Двойная изоляция и/или усиленная в каждой детали ибез устройства заземления.

Classe III Apparecchio in cui la protezione contro la scossa elettrica si basa sull'alimentazione a bassissima tensione di sicurezza e in cui non si producono tensioni superiori alla stessa.

Class III Appliance in which protection against electrical shock is guaranteed by the extremely low-voltage power supply and which does not produce higher voltages.

Clase III Aparato en el qual la proteción contra la descarga eléctrica se debe a la alimentación a muy baja tensión.

Klasse III Zum Schutz vor elektrischen Schlägen mit Kleinspannung gespeistes Gerät, in dem keine über dem Speisewert liegended Spannung erzeugt werden.

Classe III Appareil avec protection contre les décharges électriques basée sur l'alimentation à une tension de sécurité très basse et sans possibilité de production de tensions supérieures.

Класс III Прибор, в котором защита от электрического удара основана на очень низком напряжении и в котором не возникает напряжение, превышающее, превышающее, указанное.

Marchi di sicurezza
/ Safety marks

Apparecchio non adatto al montaggio su superfici normalmente infiammabili.

Appliance unsuitable for mounting on normally flammable surfaces.

Aparato no adecuado para la instalación sobre superficies normalmente inflamables.

Das Gerät ist nicht geeignet für eine Montage auf normal entflammbaren Oberflächen.

Appareil non approprié au montage sur surfaces normalement inflammables.

Прибор, непригодный для установки на воспламеняющихся поверхностях.

Divieto d'uso di lampade a luce fredda.

Warning against the use of cool-beam lamps.

Es desaconsejabole el uso de bombillas de luz fria.

Verbot Leuchten mit kaltem Licht zu verwenden.

Défenser de utiliser ampoules à lumière froide.

Запрещено использовать лампы холодного света.

Distanza minima dagli oggetti illuminati (metri).

Minimun distance from lighted objects (meters).

Distancia mìnima de los objetos alumbrados (metros).

Kleinste Entfernung von den beleuchteten Gegenständen (Meter).

Distance minime des objets éclairés (méters).

Минимальное расстояние от освещенных предметов (м).

Impiego di cavi di alimentazione, di interconnessione o di cablaggio esterno resistente al calore.

Use of heat resistant supply cables, interconnecting cables or external wiring.

Uso de un cable de alimentación, de interconexión o de cableado exterior resistente al calor.

Verwendung einer äußeren hitzebeständingen Verbindungs- oder Verkabelungs- Speiseleitung.

Utilisation d'un câble d'alimetation d'interconnexion ou de câblage extérieur réstistante à la chaleur.

Применение термостойского кабеля: питающего,
соединительного или внешней проводки.

Certificazioni
/ Certification

Gost R EAC
Attesta che il prodotto risulta conforme ai requisiti degli standard russi.

Gost R EAC
This certifies that the product is in conformity with the requirements laid down by the russian standards.

Gost R EAC
Certifica que el producto resulta conforme a los requisitos propuestos por los estándares rusos.

Gost R EAC
Bescheinigt die Übereinstimmung des Produktes mit den Anforderungen der russischen Standards.

Gost R EAC
Atteste que le produit est conforme aux conditions essentielles proposées par les standards russes.

Gost R EAC
Свидетельствует о соответствии продукции роосийским стандартам

CSQ
Attesta che la Fabbian Illuminazione s.p.a. attua un sistema qualità conforme alla normativa UNI EN ISO 9001 per garantire la qualità nella progettazione, sviluppo, fabbricazione, commercializzazione, installazione del prodotto.

CSQ
This certifies that Fabbian Illuminazione s.p.a. implements a quality system in conformity with the standard UNI EN ISO 9001 to ensure quality in design, development, manufacture, selling/ marketing and installation of the product.

CSQ
Atteste que l'entreprise Fabbian Illuminazione s.p.a. a réalisé un système de qualité conforme à la norme UNI EN ISO 9001 afin de garantir la qualité dans la conception, le développement, la fabrication, la commercialisation et l'installation du produit.

CSQ
Certifica que Fabbian Illuminazione S.p.A. aplica un sistema de calidad conforme a las normas UNI EN ISO 9001 para garantizar la calidad durante el proyecto, desarrollo, fabricación, comercialización e instalación del producto.

CSQ
Bescheinigt, dass die Firma Fabbian Illuminazione s.p.a. ein Qualitätssystem einsetzt, das für die Gewährleistung der Qualität der Planung, Entwicklung, Herstellung, Vermarktung und Installation des Produktes mit den Vorschriften UNI EN ISO 9001 übereinstimmt.

CSQ
Свидетельствует, что Fabbian Illuminazione s.p.a. осуществляет систему качества в соответствие с нормативами UNI EN ISO9001, гарантирующее качество проектирования, разработки, изготовления, продажи, установки изделия.

Grado di protezione IP
/ IP protection

Il grado di protezione degli apparecchi di illuminazione viene indicato con la sigla IP (nIternational Protection) seguita da due cifre caratteristiche. La prima di queste due cifre descrive la protezione che questi possiede contro la penetrazione di corpi solidi. La seconda indica la protezione nei confronti dei liquidi.

Gradi di protezione indicati dalla prima cifra

0 Non protetto
1 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 50 mm
2 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 12 mm
3 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 2,5 mm
4 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 1 mm
5 Protetto contro la polvere
6 Totalmente protetto contro la polvere

Gradi di protezione indicati dalla seconda cifra

0 Non protetto
1 Protetto contro lo stillicidio
2 Protetto contro lo stillicidio, con un'inclinazione fino a 15°
3 Protetto contro la pioggia
4 Protetto contro gli spruzzi d'acqua
5 Protetto contro i getti d'acqua
6 Protetto contro le onde
7 Stagno all'immersione
8 Stagno alla sommersione

The protection rating of lighting appliances is shown by the letters IP (international protection) followed by two characteristic digits. The first of these two digits indicates the degree of protection that the appliances offer against the ingress of solid foreign objects. The second indicates the protection against the ingress of water.

Protection ratings indicated by the first digit

0 No protection
1 Protected against entry of solid objects larger than 50 mm
2 Protected against entry of solid objects larger than 12 mm
3 Protected against entry of solid objects larger than 2.5 mm
4 Protected against entry of solid objects larger than 1 mm
5 Protected against dust
6 Completely protected against dust

Protection ratings indicated by the second digit

0 No protection
1 Protected against vertically falling drops of water
2 Protected against vertically falling drops of water when appliance is tilted up to 15°
3 Protected against rain
4 Protected against water spray from all directions
5 Protected against water jets
6 Protected against heavy seas, flooding
7 Sealed against immersion up to 1 metre
8 Sealed against submersion over 1 metre

El grado de protección de los aparatos de iluminación se indica con la sigla IP (nIternational Protection) seguida por dos dígitos de identificación característicos.
La primera cifra indica el grado de protección de los aparatos contra la penetración de los cuerpos sólidos. La segunda cifran idica la protección contra los líquidos.

Grados de protección comunicados por la primera cifra

0 Sin protección
1 Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 50 mm
2 Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 12 mm
3 Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 2,5 mm
4 Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 1 mm
5 Protección contra el polvo
6 Protección total contra el polvo

Grados de protección comunicados por la segunda cifra

0 Sin protección
1 Protección contra la caída vertical de gotas de agua
2 Protección contra la caída vertical de gotas de agua con una inclinación máxima de 15°
3 Protección contra la lluvia
4 Protección contra las salpicaduras de agua
5 Protección contra los chorros de agua
6 Protección contra las olas
7 Protección contra los efectos de la inmersión
8 Protección contra los efectos de la sumersión

Der Schutzgrad von Beleuchtungsgeräten wird mit der Abkürzung IP (international protection) gefolgt von einer charakteristischen zweistelligen Zahl angegeben. Die erste dieser beiden Ziffern beschreibt den Schutz, den die Beleuchtungsgeräte gegen das Eindringen von Festkörpern besitzen. Die zweite Ziffer gibt den Schutz gegenüber Flüssigkeiten an.

Von der erstenziffer angegebene schutzgrade

0 Nicht geschützt
1 Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 50 mm
2 Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 12 mm
3 Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 2,5 mm
4 Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 1 mm
5 Gegen Staub geschützt
6 Vollständig gegen Staub geschützt

Von der zweiten ziffer angegebene schutzgrade

0 Nicht geschützt
1 Geschützt gegen Tropfwasser
2 Geschützt gegen Tropfwasser mit einer Neigung bis zu 15°
3 Geschützt gegen Regen
4 Geschützt gegen Wasserspritzer
5 Geschützt gegen Wasserstrahl
6 Geschützt gegen Wellen
7 Dicht bei zeitweiligem Eintauchen
8 Dicht bei dauerndem Untertauchen

Le degré de protection des appareils d'éclairage est indiqué avec le sigle IP (International Protection) suivi par deux chiffres caractéristiques. Le premier de ces deux chiffres décrit la protection que l'appareil possède contre la pénétration de corps solides. Le deuxième chiffre indique la protection vis-à-vis des liquides.

Degrés de protection indiqués par le premier chiffre

0 Non protégé
1 Protégé contre la pénétration de corps solides de dimensions supérieures à 50 mm
2 Protégé contre la pénétration de corps solides de dimensions supérieures à 12 mm
3 Protégé contre la pénétration de corps solides de dimensions supérieures à 2,5 mm
4 Protégé contre la pénétration de corps solides de dimensions supérieures à 1 mm
5 Protégé contre la poussière
6 Totalement protégé contre la poussière

Degrés de protection indiqués par le deuxiéme chiffre

0 Non protégé
1 Protégé contre les gouttes d'eau
2 Protégé contre les gouttes d'eau, avec une inclinaison jusqu'à 15°
3 Protégé contre la pluie
4 Protégé contre les éclaboussures d'eau
5 Protégé contre les jets d'eau
6 Protégé contre les ondes
7 Étanche à l'immersion
8 Étanche à la submersion

Степень защиты осветительных приборов обозначена буквами IP (international protection) и двумя цифрами. Первая цифра указывает степень защиты от проникновения твердых частиц. Вторая цифра указывает степень защиты от проникновения жидкостей.

0 Не защищен
1 Защищен от проникновения твердых частиц диаметром больше 50 мм
2 Защищен от проникновения твердых частиц диаметром больше 12 мм
3 Защищен от проникновения твердых частиц диаметром больше 2,5 мм
4 Защищен от проникновения твердых частиц диаметром больше 1 мм
5 Защищен от пыли
6 Полностью защищен от пыи

0 Не защищен
1 Защищен от просачивания
2 Защищен от просачивания с наклоном до 15°
3 Защищен от дождя
4 Защищен от водяных брызг
5 Защищен от водяных струй
6 Защищен от волн
7 Водонепроницаем при погружении
8 Водонепроницаем при затоплении

IP20

Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 12 mm. Non protetto nei confronti dei liquidi.

Protected against entry of solid objects larger than 12 mm. No protection against the ingress of water.

Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 12 mm. Sin protección contra los líquidos.

Flüssigkeiten an Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 12 mm. Nicht geschützt Schutz gegenüber.

Protégé contre la pénétration de corps solides de dimensions supérieures à 12 mm. Non protégé vis-à-vis des liquides.

Защищен от проникновения твердых частиц диаметром больше 12 мм. Не защищен от водяных брызг.

IP21

Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 12 mm. Protetto contro lo stillicidio.

Protected against entry of solid objects larger than 12 mm. Protected against vertically falling drops of water.

Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 12 mm. Protección contra la caida vertical de gotas de agua.

Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 12mm. Geschützt gegen Tropfwasser.

Protégé contre la pénétration de corps solides de dimensions supérieures à 12mm. Protégé contre les gouttes d'eau.

Защищен от проникновения твердых частиц диаметром больше 12 мм. Защищен от просачивания.

IP40

Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 1 mm. Non protetto nei confronti dei liquidi.

Protected against entry of solid objects larger than 1 mm. No protection against the ingress of water.

Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 1 mm. Sin protección contra los líquidos.

Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 1 mm. Nicht geschützt Schutz gegenüber.

Protégé contre la pénétration de corps solides de dimensions supérieures à 1 mm. Non protégé contre les éclaboussures.

Защищен от проникновения твердых тел размером более 1 мм. Не защищен от водяных брызг.

IP41

Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 1 mm. Protetto contro lo stillicidio.

Protected against entry of solid objects larger than 1 mm. Protected against vertically falling drops of water.

Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 1 mm. Protección contra la caída vertical de gotas de agua.

Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 1 mm. Geschützt gegen Tropfwasser.

Protégé contre la pénétration de corps solides de dimensions supérieures à 1 mm. Protégé contre les gouttes d'eau.

Защищен от проникновения твердых частиц диаметром больше 1 мм. Защищен от просачивания.

IP44

Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 1 mm. Protetto contro gli spruzzi d'acqua.

Protected against entry of solid objects larger than 1 mm. Protected against water spray from.

Protección contra la penetración de cuerpos sólidos de dimensiones superiores a 1 mm. Protección contra las salpicaduras de agua.

Geschützt gegen das Eindringen von Festkörpern mit einer Größe über 1 mm. Geschützt gegen Wasserspritzer.

Protégé contre la pénétration de corps solides de dimensions supérieures à 1 mm. Protégé contre les éclaboussures.

Защищен от проникновения твердых тел размером более 1 мм. Защищен от водяных брызг.

IP65

Totalmente protetto contro la polvere. Protetto contro i getti d'acqua.

Completely protected against dust. Protected against water jets.

Protección total contra el polvo. Protección contra los chorros de agua.

Vollständig gegen Staub geschützt. Geschützt gegen Wasserstrahl.

Totalement protégé contre la poussière. Protégé contre les jets d'eau.

Полностью защищен от пыи. Защищен от водяных струй.

IP67

Totalmente protetto contro la polvere. Stagno all'immersione.

Completely protected against dust. Sealed against immersion up to 1 metre.

Protección total contra el polvo. Protección contra los efectos de la inmersión.

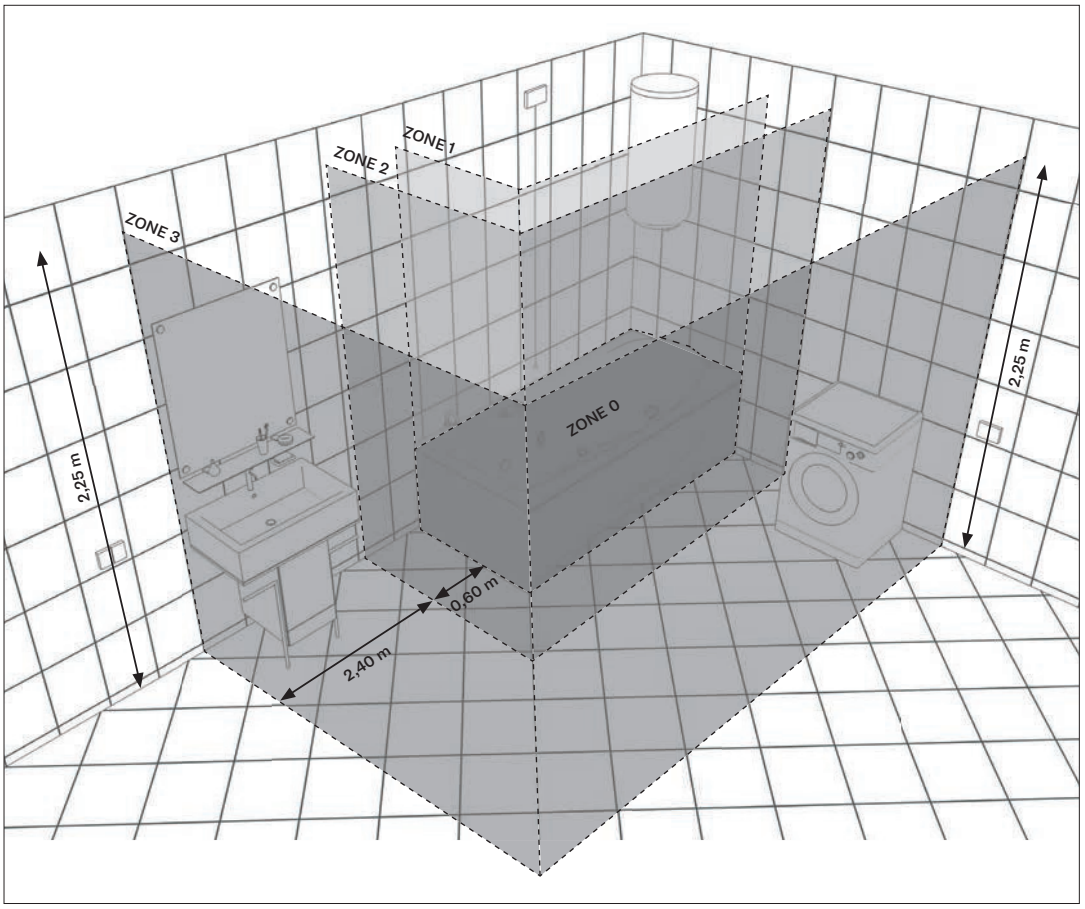
Vollständig gegen Staub geschützt. Dicht bei zeitweiligem Eintauchen.

Totalement protégé contre la poussière. Étanche à l'immersion.

Полностью защищен от пыи. Водонепроницаем при погружении.

Specifiche locali bagno e docce
/ IP protection and class insulation for bathroom

Grado di protezione e classe di isolamento locali bagni e docce
Normativa CEI 64-8/7



Zona 1

Grado di protezione IPX4 (non inferiore a IPX5 nei bagni pubblici o di comunità quando è previsto l'uso di getti d'acqua per la pulizia).
Classe di isolamento degli apparecchi illuminanti III.

Degree of protection IPX4 (not below IPX5 in public or community bathrooms when water jets are envisaged for cleaning).
Lighting insulation class III.

Grado de protección IPX4 (no inferior a IPX5 en los baños públicos o de comunidad cuando está previsto el uso de chorros de agua para la limpieza).
Clase de aislamiento de los aparatos iluminados III.

Schutzart IPX4 (nicht unter IPX5 in öffentlichen Toiletten oder Gemeinschaftstoiletten, bei Reinigung mit Strahlwasser).
Isolierklasse der Leuchten III.

Degré de protection IPX4 (non inférieur à IPX5 dans les toilettes publiques ou communes lorsque l'utilisation de jets d'eau pour le nettoyage est prévue).
Classe d'isolation des appareils d'éclairage III.

Степень защиты IPX4 (не ниже IPX5 в общественных туалетах, если уборка предусматривает полив водой из шланга).
Класс изоляции осветительных приборов III.

Zona 2

Grado di protezione IPX4 (non inferiore a IPX5 nei bagni pubblici o di comunità quando è previsto l'uso di getti d'acqua per la pulizia).
Classe di isolamento degli apparecchi illuminanti II, III e I purchè protetto da interruttore differenziale da 30 mA.

Degree of protection IPX4 (not below IPX5 in public or community bathrooms when water jets are envisaged for cleaning).
Lighting insulation class II III and I as long as protected by 30 mA residual current circuit breaker.

Grado de protección IPX4 (no inferior a IPX5 en los baños públicos o de comunidad cuando está previsto el uso de chorros de agua para la limpieza).
Clase de aislamiento de los aparatos iluminados II III y I siempre que esté protegido por un interruptor diferencial de 30mA.

Schutzart IPX4 (nicht unter IPX5 in öffentlichen Toiletten oder Gemeinschaftstoiletten, bei Reinigung mit Strahlwasser).
Isolierklasse der Leuchten II III und I nur, wenn sie durch einen Differenzialschalter von 30mA geschützt sind.

Degré de protection IPX4 (non inférieur à IPX5 dans les toilettes publiques ou communes lorsque l'utilisation de jets d'eau pour le nettoyage est prévue).
Classe d'isolation des appareils d'éclairage II, III et I à condition qu'elle soit protégée par un interrupteur différentiel de 30 mA.

Степень защиты IPX4 (не ниже IPX5 в общественных туалетах, если уборка предусматривает полив водой из шланга).
Класс изоляции осветительных приборов II и III, даже I – если прибор защищен дифференцированным переключателем на 30 мА.

Zona 3

Grado di protezione IPX1 (non inferiore a IPX5 nei bagni pubblici o di comunità quando è previsto l'uso di getti d'acqua per la pulizia).
Classe di isolamento degli apparecchi illuminanti I, II, III.

Degree of protection IPX1 (not below IPX5 in public or community bathrooms when water jets are envisaged for cleaning).
Lighting insulation class I II III.

Grado de protección IPX1 (no inferior a IPX5 en los baños públicos o de comunidad cuando está previsto el uso de chorros de agua para la limpieza).
Clase de aislamiento de los aparatos de iluminación I II III.

Schutzart IPX1 (nicht unter IPX5 in öffentlichen Toiletten oder Gemeinschaftstoiletten, bei Reinigung mit Strahlwasser).
Isolierklasse der Leuchten I II III.

Degré de protection IPX1 (non inférieur à IPX5 dans les toilettes publiques ou communes lorsque l'utilisation de jets d'eau pour le nettoyage est prévue).
Classe d'isolation des appareils d'éclairage I, II et III.

Степень защиты IPX1 (не ниже IPX5 в общественных туалетах, если уборка предусматривает полив водой из шланга).
Класс изоляции осветительных приборов I, II и III.
