CHANGE THE LOOK IN A CLICK!

PATENTED SYSTEM

NEW, EASY, QUICK AND ECONOMIC SYSTEM to change image facilities such as hotels, exemptions, restaurants, bars, commercial business....

DESCRIPTION

Jiso is launching a new product, lampshades. Its installation is composed by a patented system, which allow to use a existing lighting. With this new system we want to offer our clients both a quick and economical service to change the look of different spaces within the home, hotels and businesses.

It helps to transform out-dated or basic fixtures to make spaces more elegant and decorative. The installation of this product is very quick and easy, all you need is to fit the spotlight to the frame and fix it to ceiling. Afterwards, place the shade over the frame (see steps of installation)

ADVANTAGES

-It is very easy and economic to change the aesthetics of places, where recessed lighting have been installed.

-With this system the client change the look of any space, without touching the electrical installation.

-It is avoided to cover the holes of the lights to be replaced, and even to change the ceilings.

-We use the lights already installed with its bulbs, it is no necessary to buy bulbs nor new lights.

- The electrical installation is the same , there is no need to wire up.

- Minimum workforce with a rapid and simple installation, without complications.

-We obtain another environment, another type of lighting that helps to the perception of this change of image expected by the client.

-This system achieves an improvement of the space and emphasizes his decoration in a very elegant way, offering a great warmth, enriching the existing lighting.

BODY AND STRUCTURE

Product composed by a shade and white painted metal framework
Lamp shades are manufactured in PVC and coated in FABRIC.
Difusor cover is manufactured in KINGPLAK POLIPROPILENE
0.8 mm thick for HL – 0.12 mm thick for DL.
Sticked using a special glue.

There are 24 finishes, 3 diameters and 4 different heights available. These different heights allow to combine them and make a unique light shade, creating suggestive and hot environments in the stays where they are placed.

Our shades can be adapted to the client requirements, adjusting to the type of interior decoration of the space.

Packaging: the shade and frame are sold together as a whole unit and supplied in protective plastic packaging, which serves to visualize the finished one and the good condition of the product, always before opening it.
