

SL.EVO

SL.EVO

SL.EVO threads its linear form around angles and surfaces within a space creating a web of light, turning the visitor into an explorer.

The minimal design affords a total-light effect providing outstanding visual comfort with reductions in luminance levels in upper emission corners and efficiency levels of over 73%.

The numerous installation types meet the needs of the most demanding lighting designers and make SL.EVO the perfect solution for spaces of every shape.

High luminous efficiency

SL.EVO is distinguished by its high luminous efficiency, both with LED sources and with linear fluorescent lamps associated with satin-finish PMMA or TXT diffusers.

This feature comes from the optical compartment made up of the parabolic reflector and the diffuser, which together guarantee a light output of more than 73% for the version with a PMMA diffuser and 80% for the version with a TXT diffuser.

The high luminous efficiency allows you to reduce the number of light sources, while retaining the same average lighting (Em) and provides considerable savings in money and energy.

LED Sources

The high ratio between the luminous flux of the appliance and the power absorbed confirms the high luminous efficiency of SL.EVO LEDs.

The LED engine modules installed inside the lighting body guarantee, thanks to their structure, maximum uniformity and total absence of shadows, even in corners. The duration of more than 50,000 hours reduces maintenance costs to a minimum, increasing money and energy savings.

SL.EVO LED is available with a satin finish PMMA diffuser and LED engine 4000 K - "neutral white".

Colour temperature 3000 K - "warm white" and TXT diffuser on request.

Linear fluorescent sources

100 mm overlamping eliminates all shadow areas, ensuring excellent lighting uniformity.

The parabolic reflector in highly pure mirror aluminium guarantees high performances and is supplied as standard.

SL.EVO is available with a satin finish PMMA diffuser or a TXT diffuser.

Linear fluorescent sources to be ordered separately.

Satin finish PMMA diffuser

Luminous diffusion and even spread of light.

The satin finish PMMA diffuser is shockproof and anti-ageing with a snap fastening system.

The diffused emission is harmonious, ensuring an even spread of light and high level of visual comfort.

Applications:

halls, meeting rooms, showrooms, exhibition areas, areas for relaxation, passageways and multifunctional spaces.

SL.EVO PMMA 1x28W T5

η 73%

UGR transversal < 20

UGR longitudinal < 22

TXT diffuser

Controlled light emission and excellent diffusion of source.

Colourless methacrylate TXT diffuser with outer surface microtextured with micro-pyramids to reduce levels of luminance in the upper angles of emission. It ensures uniform illumination and an even diffusion of the light sources.

Application:

workplaces with flat screen video display units.

SL.EVO TXT 1x28W T5

η 80%

UGR transversal < 17

UGR longitudinal < 20

A complete range

SL.EVO ensures five types of installation, meeting every design need: suspension with sliding cables, ceiling fitting, semirecessed fitting with the upper end concealed in the plasterboard and with perfectly square exposed cross-section, frame recessed fitting and trimless recessed fitting without a frame.

SL.EVO

version suitable for three different types of installation

Types of angular module

The angular modules for continuous row with suspended, ceiling or semi-recessed installation have an angle of 90° on the horizontal plane.

The angular modules for continuous row with recess installation, on the other hand, are available with angles of 90° on the horizontal plane, or with angles of 90° between the wall and the ceiling and rebound angles of 0°, 15° and 35°.

Available both for LED sources, and for 14/24W fluorescent lamps with overlapping of 100 mm for total homogeneity.

The electrical harness, lamp holder, through lines and parabolic reflectors are snap mounted onto plastic elements fixed to the extruded unit.

The linear connectors are included, whilst the diffusers, suspension kits and adjustable brackets must be ordered separately.

MEC5965	Satin finish PMMA diffuser 90° - 35°

Housing

Housing consisting of powder-coated extruded aluminium unit. Aluminium end caps painted in the same colour as the housing with internal fixing and no exposed screws.

Versions

Suspension/ceiling/semi-recessed, frame recessed and trimless

recessed installation. Single and continuous row configuration with linear and angular modules.

Optic system

Satin finish PMMA diffuser and TXT diffuser.

Sources

T5 linear fluorescent lamps.

Electrical harness

Electrical harness wired for 220-240V/50-60Hz power supply. 2.5 mm² LTN terminal block. Electronic power unit. Single switch.

Accessories

Pair of adjustable brackets, through-line and suspension kit.

Norms

EN 60 598-1, EN 60 598-2-2, EN 60 598-2-22

Colours

DN Embossed white RAL 9003

Available colours
CH Semi-bright aluminium RAL 9006

CE   IP20

levels of luminance in the
upper angles of emission.

SL.EVO TXT 1x28W T5
η 80%
UGR transversal < 17
UGR longitudinal < 20

Suspended mounting

FLUO LED

MEC1742
suspension kit including a L=2000 mm steel cable, spring adjuster and ceiling rose and ogive nickel

MEC5938
Suspension kit made up of a steel cable with loop L=2000 mm and a spring-adjustment element

electrified ceiling rose with a clear power cable L=2000 mm

MEC2063AE
cable 3x1 mm² - white RAL 9003

MEC2063CH
cable 3x1 mm²
semi-bright aluminium RAL 9006

MEC2064AE
cable 5x1 mm² - white RAL 9003

MEC2064CH
cable 5x1 mm²
semi-bright aluminium RAL 9006

electrified ceiling rose with two 4x1 mm² and 3x1mm² clear power cables L=2000 mm

MEC2065AE
white RAL 9003

MEC2065CH
semi-bright aluminium RAL 9006

MEC1838
3x1 mm² clear power cable L=5500 mm

MEC1830
5x1 mm² clear power cable L=5500 mm

CAV0060
steel cable for ceiling roses
L=5000 mm

CAV0113
steel cable with loop
L=5000 mm

Recessed and semi-recessed mounting

FLUO LED

MEC2036
pair of brackets for load bearing false-ceilings (2 pcs.)

recessed mounting for SL.EVO FR/TR and SL.EVO LED FR/TR

semi-recessed mounting for SL.EVO and SL.EVO LED

MEC1983DN
wall mounting of pair bracket (2 pcs.)

Through wiring SL.EVO continuous and angular (optional)

FLUO

3 POLE

MEC5939
cable 3x1,5mm² L=1200mm
(for 14/24W 21/39W 28/54W)

MEC5940
cable 3x1,5mm² L=1500mm
(for 35/49W) compatible with electronic ballast.

5 POLE

MEC5941
cable 5x1,5mm² L=1200mm
(for 14/24W 21/39W 28/54W)

MEC5942
cable 5x1,5mm² L=1500mm
(for 35/49W) compatible with dimmable wiring and emergency kit.

7 POLE

MEC5943
cable 7x1,5mm² L=1200mm
(for 14/24W 21/39W 28/54W)

MEC5944
cable 7x1,5mm² L=1500mm
(for 35/49W) compatible with dimmable wiring and emergency kit.

Note

the number of electrical lines to be ordered separately is equal to the number of linear fluorescent lamps.

Note

the SL.EVO LED version features through wiring.

End caps SL.EVO LED continuous and angular

LED

MEC5956
end caps for SL.EVO LED

MEC5957
end caps for SL.EVO LED FR

MEC5958
end caps for SL.EVO LED TR

Note

end caps fitted to the housing of the SL.EVO LED single version as well as the single and continuous versions with fluorescent lamps.
