

ZONCA

history of design

Light, design and artisan craftsmanship - this has been the Zonca family's philosophy for three generations, and Zonca International boasts almost a century of forward-thinking experience. A history of quality and all-Italian skill that has grown progressively, constantly reinterpreting market values and innovation in art and technology, translating light into a contemporary language.

Light is beauty and elegance, light is complexity and simplicity. Light is inspiration, but also the subject around which every Zonca International creation is born. A complete range of lighting solutions for the most prestigious locations, from major international hotels to luxury homes, from cutting-edge architecture to stylish guesthouses.

With extensive experience and an ongoing commitment to innovation, Zonca International takes care of every detail, delivering unique and customised, tailor-made products which reflect the most intimate desires of our clients, the physical manifestation of our company's mission to deliver the highest quality, made in Italy. Attention to technical and aesthetic requirements, the selection of the finest materials, crafted entirely by hand, and our after-sales service network are what make Zonca International a truly reliable partner, creating exclusive lighting for every setting.

Every Zonca International project exudes all the creativity of our talented in-house design team, accompanied by some of the most famous designers on the contemporary scene, in a constant search for innovative solutions to bring light to life.
